

**Junction tightening and installing a footpath  
to extend to ditch at end of school.  
Extending the new footpath to boundary of school.**

**Upgrading of pedestrian crossing to ramped crossing.**

**Removing of current bollards and install a footpath that will connect from bus drop location  
to front gate. Along the edge of the new footpath pencil bollards will be placed.  
A landing platform will be created for student to come off and on the bus in a safe  
manner and prevent any need to walk on carriageway.  
At entrance to teachers carpark, bring footpath through this area and install  
drop kerbs to leave access for cars to enter the carpark. This junction will prioritize students.**
