

Waterford City and County Draft Development Plan 2022 - 2028

Appendix 16: Implementation and Monitoring

1.1 Introduction

The implementation and delivery of the City and County Development Plan is a key objective of the Planning Authority. The establishment of a performance management system is important to better understand whether, and to what extent, the Policy Objectives of the City and County Development Plan are being realised.

The Waterford City and County Development Plan introduces a formalised approach to Plan implementation, monitoring and evaluation, which provides a framework for measuring the outcomes of the Policy Objectives of the Plan. The framework seeks to move beyond assessment of the planning system from a primarily procedural and administrative perspective to a richer form of planning performance which incorporates planning outcome monitoring and evaluation across a broad range of policies. It is acknowledged that Policy Objectives often take a number of Plan cycles to be fully realised and as such the framework provides a first step towards assessing the value and quality of planning outcomes which will continue through successive City and County Development Plans.

1.2 Implementation and Monitoring

The implementation and monitoring framework for the Plan is set out in Section 16.5 below. The framework is anchored to the Vision for the City and County Development Plan (see Volume 1: Section 1.1) and the 8 No. Strategic County Goals which underpin its delivery (see Volume 1: Section 1.6). The City and County Development Plan Vision and Strategic County Goals are themselves broadly aligned with the Regional Strategic Outcomes of the RSES, the National Strategic Outcomes of the NPF, and the United Nations Sustainable Development Goals.

The implementation and monitoring framework categorises key Policy Objectives in terms of their contribution towards the achievement of the Strategic County Outcomes. Many of the Policy Objectives are multi-faceted and as such contribute to the achievement of multiple Strategic County Outcomes, which themselves are interrelated. Policy Objectives are assessed in terms of means of implementation and also key performance indicators to monitor/ evaluate the delivery of the Policy Objective.

It is noted that the intention of Policy Objectives are wide-ranging and as such the implementation and monitoring framework does not comprise a comprehensive list of all policies. While every effort has been made to formulate Policy Objectives in the Plan that are SMART (Specific, Measurable, Assignable, Realistic and Time-Related) it is acknowledged that not all Policy Objectives may be measured in easily identifiable quantitative values. Many Policy Objectives relate to development management processes which may be implemented through established internal processes and procedures. Other Policy Objectives may relate to criteria which are considered as part of multifaceted decision-making processes which require the balancing of a range of Policy Objectives against particular site-specific circumstances.

In addition, it is noted that many Policy Objectives are intended to facilitate and support an intended outcome, rather than act as a direct means of delivering the outcome. In this regard, implementation of the Policy Objectives of the City and County Development Plan, and the delivery of desired planning outcomes, may be subject to a range of external factors, most notably wider economic circumstances and availability of resources. Notwithstanding these limitations, the implementation and monitoring framework seeks to align, where possible, the right indicators that appropriately reflect and measure whether a Policy Objective is being achieved.

1.3 Plan Evaluation and Reporting

The implementation and monitoring framework is intended to function as a formal feedback loop with the evaluation and reporting processes intended to comprise a key input into the formulation and refinement of future planning policy. In this manner, the framework is intended to serve as an important evidence-based input and integrate with the review process of subsequent City and County Development Plans. In terms of its formal evaluation role, the framework is intended to assist the Planning Authority in meeting its statutory reporting requirements including:

- The 2 Year Progress Report of the County Development Plan (as required under Section 15(2) of The Act).
- Report to the Southern Regional Assembly setting out progress made in supporting objectives of the RSES (as required under Section 25A(1) of The Act).

1.4 Environmental Monitoring

Article 10 of the SEA Directive requires monitoring of the significant environmental effects of the implementation of the County Development Plan in order to identify, at an early stage, unforeseen adverse effects and to enable appropriate remedial action to be undertaken. While the monitoring framework set out below incorporates some monitoring of environment related objectives, the full and comprehensive monitoring and evaluation assessment, required to be undertaken under Article 10 of the SEA Directive, is set out in the Strategic Environmental Assessment that accompanies the County Development Plan.

1.5 Implementation and Monitoring Framework

1.5.1 Spatial Vision and Core Strategy

Policy Objective	Strategic Goals								Implementation	Monitoring and Evaluation Key Performance Indicator/Data Source
	1 Promote Compact Development	2 Support Strong Economy and Education	3 Support Rural Growth and Tourism	4 Promote Sustainable Connectivity	5 Deliver Sustainable Infrastructure	6 Climate Change Resilience	7 Heritage Preservation and Biodiversity Enhancement	8 Making Sustainable Places
