1.0 Introduction

1.0 Introduction

Part V, Section 94 of the Planning and Development Act, 2000 (as amended) requires planning authorities to include in its development plan a Housing Strategy for the purpose of ensuring that the proper planning and sustainable development of the area provides for the housing of the existing and future population of the area. This Housing Strategy has been prepared on behalf of Waterford City & County Council to meet the statutory requirements set out under the Act. The Housing Strategy also addresses relevant provisions contained within the Housing (Miscellaneous Provision) Act, 2009 and the Urban Regeneration and Housing Act 2015.

The Housing Strategy is a critical component of the County Development Plan (CDP) and assists in translating national housing policies and housing supply responses to the local level. The Housing Strategy informs the policies and objectives of the CDP, and provides details in relation to housing requirements including types, sizes and tenures.

Waterford City & County Council was established following the amalgamation of Waterford City Council and Waterford County Council on the 1st June 2014. The three existing development plans within the amalgamated Council area, Waterford City Development Plan 2013 – 2019, Waterford County Development Plan 2011 – 2017, & the Dungarvan Town Development Plan 2012 – 2018, are replaced by this new City and County Development Plan.

The Housing Strategy has taken cognisance of significant recent changes in national and regional planning policy, notably the publication of the National Planning Framework (NPF) and the Regional Spatial and Economic Strategy (RSES) for the Southern Regional Assembly area.

This Housing Strategy includes the determination of housing requirements in County Waterford over the period of the development plan 2022-2028. Demographic, economic and social inputs have been examined and utilised to estimate projected population, households and associated housing needs in County Waterford.

The NPF has introduced the requirement for a Housing Need Demand Assessment (HNDA) under National Policy Objective 37 in order *‘to correlate and accurately align future housing requirements’*. The HNDA contained herein has been prepared with regard to guidance within the NPF and population and housing demand data provided in the NPF Implementation Roadmap, Ministerial Circulars and Section 28 guidelines. The NPF notes the HDNA should *‘primarily inform housing policies, housing strategies and associated land use zoning policies as well as assisting in determining where new policy areas or investment programmes are to be developed’*. In addition, Circular Letter Housing 14/2021 was issued on the 14th of April 2021 and accompanies a suite of documents providing updated guidance on Housing Need Demand Assessment.

The HDNA provides the evidence base to inform decision-making around the current and future housing supply within the county, examining trends in population, house prices and rental prices and calculating affordability for different housing tenures including private market purchase and private rental. The HDNA also arrives at a projected social housing need based on the consideration of affordability outlined above.

1.1 Methodology

The NPF indicates the purpose of the HNDA tool is to:

- *‘Assist local authorities to develop long-term strategic views of housing need across all tenures.*
- *Provide a robust evidence base to support decisions about new housing supply, wider investment and housing related services that inform an overall national housing profile.*
- *Inform policies about the proportion of social and affordable housing required, including the need for different types and sizes of provision.*
- *Provide evidence to inform policies related to the provision of specialist housing and housing related services’.*

The NPF further defines the HDNA as a database which allows local authorities to run a number of different scenarios to inform key decisions on housing need and supply, and are designed to give broad, long run estimates of what future housing need might be, rather than precision estimates.

The NPF lists the following key evidence inputs that will inform and drive the HDNA model, based around:

1. *Demographic trends, affordability trends and wider economic trends.*
2. *Housing Stock Profile Pressures, existing need and management issues*
3. *Estimate future housing need and demand.*

The HNDA is structured through a number of stages which project and determine the future housing requirements to cover the plan period. The components considered include projected demographic and household data to understand future housing need in the county over the plan period.

The next component undertakes an assessment of housing affordability, considering house price data and the ability of households to access private market ownership or private market rental. This assessment leads to the identification of social and affordable housing needs in Waterford during the plan period.

1.2 Structure

Section 1 introduces the Housing Strategy and the HNDA process, outlining the policy framework and key objectives and purposes. It also discusses the HDNA methodology used to project future housing requirements over the plan period.

Section 2 analyses the legislative and policy framework relevant to Housing Strategies and Housing Need Demand Assessment.

Section 3 provides an overview of the existing housing context utilising demographic and housing data from the CSO, Daft, the Residential Tenancies Board and the Property Price Register. It also reviews data from Waterford City and County Council on unfinished housing estates and planning permissions to further interrogate the local context in Waterford.

Section 4 analyses housing requirements in County Waterford building upon Section 3 which provided the local housing context to be considered. This section projects and determines the housing need

and supply over the 2022-2028 development plan period through a number of sequential stages outlined in greater detail in Section 4.

Section 5 summarises the overall housing requirements for the county having regard to the supply and demand analysis outputs determined in the preceding sections.

Section 6 concludes with the findings of the Housing Strategy and HNDA.

2.0 Planning Policy and Legislative Framework

2.0 Planning Policy and Legislative Framework

A comprehensive review of all relevant national, regional and local housing and associated planning legislation, policies and plans has been carried out and discussed herein as they relate to the Housing Strategy. This includes the following:

National Legislation and Policy

- The Planning and Development Act, 2000 (as amended)
- Planning and Development (Amendment) (No. 2) Regulations 2018
- National Planning Framework (NPF) (Project Ireland 2040)
- Implementation Roadmap for the National Planning Framework (NPF)
- Housing Supply Target Methodology for Development Planning - Guidelines for Planning Authorities (2020)
- Circular Letter Housing 14/2021 - Re: Housing Need and Demand Assessment (HNDA)
- Guidance on the Preparation of a Housing Need and Demand Assessment
- National Development Plan 2018-2027 (NDP) (Project Ireland 2040)
- Rebuilding Ireland – Action Plan for Housing and Homelessness (2016)
- Housing For All (2021) / Programme for Government: Our Shared Future (2020)
- National Vacant Housing Reuse Strategy 2018-2021
- Social Housing Strategy 2020
- Urban Regeneration and Housing Act 2015
- National Housing Strategy for People with a Disability (2011-2016)
- Design Standards for New Apartments - Guidelines for Planning Authorities (2020)

Regional Policy

- Regional Spatial and Economic Strategy for the Southern Region

Local Policy

- Waterford County Council - Traveller Accommodation Programme 2019-2024
- Waterford Age Friendly Alliance Strategy 2017-2022

2.1 National Legislation and Policy

Planning and Development Act, 2000

Section 94 of Part V of the Planning & Development Act 2000 as amended (the Act) requires the inclusion in a development plan of a housing strategy for the purposes of ensuring that the proper planning and sustainable development of the area of the development plan provides for the housing of the existing and future population of the area.

Part V, Section 94 of the Planning and Development Act, 2000 (as amended) requires planning authorities to include in its development plan a Housing Strategy for the purpose of ensuring that the proper planning and sustainable development of the area provides for the housing of the existing and future population of the area.

Section 94 (3) states that a housing strategy shall take into account:

- a) the existing need and the likely future need for housing,
- b) the need to ensure that housing is available for persons who have different levels of income,
- c) the need to ensure that a mixture of house types and sizes is developed to reasonably match the requirements of the different categories of households, including the special requirements of elderly persons and persons with disabilities,
- d) the need to counteract undue segregation in housing between persons of different social backgrounds.

Section 94 (4) states that a housing strategy shall include an estimate of the amount of:

- Housing for the purposes of the provision of social housing support within the meaning of the Housing (Miscellaneous Provisions) Act 2009, and
- Affordable housing that will be required within the county during the period of the plan.

Section 94 (5) (a) states that when making these estimates, the planning authority shall have regard to the following:

- I. the supply of and demand for houses generally, or houses of a particular class or classes, in the whole or part of the area of the development plan;
- II. the price of houses generally, or houses of a particular class or classes, in the whole or part of the area of the development plan;
- III. the income of persons generally or of a particular class or classes of person who require houses in the area of the development plan;
- IV. the rates of interest on mortgages for house purchase;
- V. the relationship between the price of housing, incomes and rates of interest for the purpose of establishing the affordability of houses in the area of the development plan,
- VI. such other matters as the planning authority considers appropriate.

Planning and Development (Amendment) (No. 2) Regulations 2018

This amendment to the Planning and Development Regulations allows for the temporary change of use of some vacant commercial premises to residential use as exempt development (subject to conditions and limitations). Development shall not exceed the provision of more than 9 residential units in any structure. The change of use, and any related works, must occur between when the Regulations come into operation on 8 February 2018 and 31 December 2021.

In addition, the existing structure or part of the structure, which is the subject of the change of use, is required to be vacant for a period of two years immediately prior to when the development takes place. The exemption applies to existing buildings that have a current commercial use (Class 1, 2, 3, and 6 of Part 4 to Schedule 2).

Project Ireland 2040 - National Planning Framework (NPF) (2018)

The National Planning Framework (NPF) is a high-level strategy that will shape growth and development in Ireland out to the year 2040. The NPF introduces the requirement for a Housing Need Demand Assessment (HNDA), referred to under National Policy Objective 20 and 37, in order to *'ensure that the plan-making system is supported by a robust methodology to inform policies and funding initiatives around housing and associated land requirements'*. The HNDA is to be developed by each Local Authority to support the preparation of housing strategies and city and county development plans, local area plans, traveller accommodation plans etc.

National Policy Objective 20 states:

'Project the need for single housing in the countryside through the local authority's overall Housing Need Demand Assessment (HNDA) tool and county development plan core strategy processes'.

National Policy Objective 37 states:

'A 'Housing Need Demand Assessment' (HNDA) is to be undertaken for each Local Authority Area in order to correlate and accurately align future housing requirements. The HNDA is:

- to be undertaken by Local Authorities with coordination assistance to be provided by the Regional Assemblies, and at a Metropolitan scale, particularly where inter-county and inter-regional settlement interactions are to be planned for and managed;*
- to primarily inform housing policies, housing strategies and associated land use zoning policies as well as assisting in determining where new policy areas or investment programmes are to be developed; and*
- to be supported, through the establishment of a coordination and monitoring unit to assist Local Authorities and Regional Assemblies in the development of the HNDA (DHPLG, Regional Assemblies and the Local Authorities). This will involve developing and coordinating a centralised spatial database for Local Authority Housing data that supports the HNDA being undertaken by Local Authorities'*.

National Policy Objective 36 of the NPF confirms the importance of an integrated approach to population and housing in the planning system, and refers to Section 28 guidelines to be provided in this regard:

‘New statutory guidelines, supported by wider methodologies and data sources, will be put in place under Section 28 of the Planning and Development Act to improve the evidence base, effectiveness and consistency of the planning process for housing provision at regional, metropolitan and local authority levels. This will be supported by the provision of standardised requirements by regulation for the recording of planning and housing data by the local authorities in order to provide a consistent and robust evidence base for housing policy formulation’.

In relation to the demand for single housing in the countryside, the NFP notes the relationship between the core strategy of county development plans and the local authority’s overall Housing Need Demand Assessment (HNDA) and states that quantifying *‘the need for single housing on an evidence basis will assist in supporting the preparation of a comprehensive housing strategy and associated land use policies’.*

The NPF indicates the purpose of the HNDA tool is to:

- *‘Assist local authorities to develop long-term strategic views of housing need across all tenures.*
- *Provide a robust evidence base to support decisions about new housing supply, wider investment and housing related services that inform an overall national housing profile.*
- *Inform policies about the proportion of social and affordable housing required, including the need for different types and sizes of provision.*
- *Provide evidence to inform policies related to the provision of specialist housing and housing related services’.*

The NPF further defines the HDNA as a database which allows local authorities to run a number of different scenarios to inform key decisions on housing need and supply, and are designed to give broad, long run estimates of what future housing need might be, rather than precision estimates.

The NPF lists the following key evidence inputs that will inform and drive the HDNA model, based around:

‘1. Demographic trends, affordability trends and wider economic trends.

The use of economic forecasting or econometric work underpins this section. Data requirements include household composition/projections, house prices, rents, number of first time buyers (FTBs) and loan to value (LTV) mortgage rates, economic activity and employment rates etc.

2. Housing Stock Profile Pressures, existing need and management issues

Housing Stock Profile Pressures (and existing need) and management issues. Undertaking a detailed profile of local housing stock and stock pressures, including local authority housing, to identify the main pressures relating to supply and demand, ineffective stock and overall condition as well as priorities for future stock management. Information is required on dwelling size, dwelling type, dwelling condition and stock pressures (occupancy/under occupancy stock turnover etc.).

3. Estimate future housing need and demand.

This is broken down into: owner occupation, private sector, below market rent and social rent. Detailed guidance is provided on how to undertake this work, including how and on what evidence to base assumptions on wealth affordability, both in terms of home ownership and the different rental categories’.

The NPF adopts a growth scenario referred to as ‘regional parity’ and accordingly sets out a growth objective under National Policy Objective 1a that *‘the projected level of population and employment growth in the Eastern and Midland Regional Assembly area will be at least matched by that of the Northern and Western and Southern Regional Assembly areas combined’*.

In relation to the cities, the NPF notes it supports ambitious growth targets to enable the four cities of Cork, Limerick, Galway and Waterford to each grow by at least 50% to 2040 and to enhance their significant potential to become cities of scale.

In relation to Waterford the NPF states:

‘Waterford is the principal urban centre in Ireland’s south-east and is unique in having a network of large and strong regional urban centres in close proximity within each of the surrounding counties that both complement the role of Waterford and perform strong regional and local economic and developmental roles for their own areas’.

National Policy Objective 3b states: *‘Deliver at least half (50%) of all new homes that are targeted in the five Cities and suburbs of Dublin, Cork, Limerick, Galway and Waterford, within their existing built-up footprints’*.

The NPF sets out a growth strategy that has a particular focus on the five cities and regional growth centres as set out in National Policy Objective 7, which refers to strengthening Ireland’s overall urban structure. National Policy Objective 8 sets out the Minimum Target Population for Waterford City and Suburbs by 2040 of 81,000 (population in 2016 was 54,000). The NPF notes that Waterford City has 20,298 resident workers, with a jobs to resident workers ratio of 1.201.

Implementation Roadmap for the National Planning Framework (2018)

The Implementation Roadmap for the National Planning Framework published in July 2018 provides transitional population projections as a range for each county. The roadmap notes that *‘the transitional population projections plot a growth trajectory set approximately mid-way between what is currently being planned for in statutory Development Plans if projected forward to 2031, and the more likely evidence based and nationally coherent projected scenario to 2031 and 2040. These ‘adjusted’ transitional figures will apply to 2026 and will also inform the period to 2031’*.

The Roadmap states that *‘scope for headroom, not exceeding 25%, can be considered to 2026 in those counties where projected population growth is projected to be at or above the national average baseline’*. The Roadmap lists County Waterford as one of these counties. County Waterford is provided with a population range of 132,000 -135,000 up to 2026, and 137,000 - 144,000 to 2031.

South-East	2016	2026	2031
Waterford	116,000	132,000-135,000	137,000-144,000
Wexford	149,000	163,000-166,000	169,000-172,500
Kilkenny	99,000	108,000-110,000	112,000-114,500
Tipperary SR	88,500	96,000-98,000	99,500-102,000
Carlow	57,000	62,000-63,000	64,000-65,500
Subtotal	509,500	561,000-572,000	581,500-598,500

Table 2.1: Transitional Regional and County Population Projections to 2031 (Source: Implementation Roadmap for the National Planning Framework, 2018).

The roadmap further refers to the role of the *'initial Regional Strategies to set the parameters for City and County Development Plans to be approved during 2021/22, to cover the period to 2026/27'*.

The NPF Implementation Roadmap also notes that the boundary of the Waterford Metropolitan Area was defined *'using a methodology that was developed having regard to similar considerations to those for Dublin and Cork, as well as key Census data'*.

The Roadmap provides a breakdown of the population for the Waterford Metropolitan Area as of 2016, indicating a total population of 59,854, and maps for each of the Metropolitan Areas.

Waterford Metropolitan Areas	Population	Area (sq.km)	Density persons/sq.km
Waterford City/County Council			
Waterford City Area	48,216	38.31	1,259
Waterford County Area	3,399	46.74	73
Waterford City and County Council	51,615	85.05	607
Kilkenny County Council Area	8,239	57.60	143
Totals/Average	59,854	143	420

Table 2.2: Metropolitan Area Population, 2016 (Source: Implementation Roadmap for the National Planning Framework, 2018).

Housing Supply Target Methodology for Development Planning - Guidelines for Planning Authorities (2020)

A Ministerial Circular and accompanying Section 28 Planning Guidelines (*Housing Supply Target Methodology for Development Planning*) were issued by Minister Darragh O'Brien in December 2020. The purpose of the circular and guidelines is to set out a consistently applicable methodology that enables National Planning Framework (NPF) population targets to be translated into household demand projections and integrated housing supply targets at both national and local levels. The projected NPF population distribution forms the basis for one of the housing demand projection scenarios modelled by the ESRI, and this remains the preferred national development scenario to 2040. The guidelines note that the projected county population ranges set out in the Implementation Roadmap for the NPF *'continue to be the population parameters for local authority development planning processes. City or County development plans must therefore plan for the identified population growth within these estimates and use them as the basis for strategic decision-making in their development plan process, including its core strategy, settlement strategy and housing policies'*.

The guidelines note that in the absence of guidance, varying approaches have been taken by different local authorities in the interpretation and application of the population projections provided, with differing assumptions and methodologies resulting in inconsistency in translating the projections into housing demand. In order to resolve this issue and *'strengthen the relationship between national and regional population projections and their integration into the development planning process at local authority level'*, the Economic and Social Research Institute (ESRI) were commissioned by the Department of Housing, Local Government and Heritage to provide a *'nationally integrated and standardised evidence base for local authorities to estimate overall housing demand'*. The ESRI identified four different scenarios for future population and housing demand.

NPF Scenario (NPF 50:50 City)

The guidelines state that the NPF 50:50 City scenario identified in the ESRI research paper¹ is broadly consistent with the National Planning Framework strategy and is therefore the '*recommended housing demand scenario to be utilised by planning authorities in their planning functions in order to plan for the provision of housing to meet projected levels of demand in their administrative area, in accordance with the NPF strategy*'.

Appendix 1 of the Ministerial Circular provides projected housing demand for each local authority area for the period 2020-2031 based on the NPF Scenario. The projected housing demand for County Waterford (as provided in Appendix 1 of the circular) is set out below in Table 2.3, and these projections have been utilised herein in the methodology for calculating housing demand for the development plan period (Section 4).

Waterford City and County Council		Annual Average	Total Households
A	ESRI NPF scenario projected new household demand 2017 to 2031	629	9,440
B	Actual new housing supply 2017-19	383	1,150
C	Homeless households, and estimated unmet demand as at Census 2016	N/A	164
D	Housing Demand 2020-31 =Total (A-B+C)/12	705	8,454

Table 2.3: Projected Housing Demand for County Waterford (Source: Table 21 of Appendix 1 - Projected Housing Demand by Local Authority Area 2020-2031, ESRI NPF Scenario Housing Supply Target').

The Section 28 guidelines provide a methodology for the application of NPF population and housing projections into local authority plan processes (in this case the Waterford City and County Development Plan 2022-2028), included below as Table 2.4.

¹ *Regional Demographics and Structural Housing Demand at a County Level*, Research Series, Number 111, Economic and Social Research Institute, December 2020.

City/County Council	Annual Average Households	Total Households	
A	ESRI NPF scenario projected new household demand 2017 to Plan end year, or quarter (pro-rata)	Total projection/ relevant time period	Total projection ^A
B	Actual new housing supply 2017 to most recent available year or quarter prior to Plan commencement	Total completions /relevant time period	Total completions ^B
C	Homeless households (latest data), and unmet demand as at most recent Census	N/A	Total existing unmet demand ^C
D	Plan Housing Demand = Total (A-B+C) (Projected ESRI NPF demand - new completions + Unmet demand)	Total Plan Demand/6 years	Total Demand for full 6-year plan period
E	Potential adjustment 1 to end 2026 portion of plan period to facilitate convergence to NPF strategy (where justified)	Mid-point between ESRI NPF and Baseline scenarios to 2026 in lieu of A above	Adjusted Total Demand
F	Potential adjustment 2 to end 2026 portion of plan period to facilitate convergence to NPF strategy, applicable where B exceeds or is close to D (where justified)	Mid-point between ESRI NPF and baseline scenarios to 2026 in lieu of A above, plus up to 25%	Adjusted Total Demand

Table 2.4: Methodology for the application of NPF population and housing projections into local authority plan processes (Source: Table 1 of Housing Supply Target Methodology for Development Planning - Guidelines for Planning Authorities (2020)).

The methodology provided in the guidelines (in addition to the worked examples set out in Appendix 1 of the guidelines) has been utilised in Section 4 to calculate the housing demand for the development plan period. The projected NPF 50:50 housing demand scenario for County Waterford has been utilised as required by the guidelines.

[Circular Letter Housing 14/2021 - Re: Housing Need and Demand Assessment \(HNDA\)](#)

Circular Letter Housing 14/2021 accompanies a suite of documents providing updated guidance on Housing Need Demand Assessment. The circular advises that each local authority may now undertake a Housing Need and Demand Assessment for its administrative area using the specific HNDA Guidance and Tool and other resources available provided by the Department.

The Circular states ‘it is expected that HNDA will be integrated into the development plan review process where planning authorities give notice of review of a development plan in accordance with section 11(1) of the 2000 Act, after the date of this Circular. Planning authorities may also consider variation of a development plan where a completed HNDA significantly affects a Housing Strategy in accordance with section 95(3) of the Act’.

The circular notes that the Guidance on the Preparation of a Housing Need and Demand Assessment outlines the process for compiling a HNDA and what it should contain.

The Circular states that *'the section 28 planning guidelines of 18th December facilitate decisions regarding new housing supply targets for the 6-year period of development plans that are being formulated currently, to be determined in advance of the full integration of new HNDA methodology into the Housing Strategy preparation process'*.

Furthermore, the Circular states that Planning authorities are advised *'to ensure that the relevant Housing Supply Target determined through applying the Housing Supply Target Methodology for Development Planning is used as the basis for the development plan process'*.

Accordingly, the Housing Supply Target determined through the application of the Section 28 guidelines issued in December 2020 (*Housing Supply Target Methodology for Development Planning*) is utilised as the basis for this Housing Strategy as part of the overall development plan process. The Circular notes that Department intends to issue revised Housing Strategy Guidelines under section 28 to take account of housing need and demand assessment

Guidance on the Preparation of a Housing Need and Demand Assessment

The Department of Housing, Local Government and Heritage published a guidance document accompanying the circular on the preparation of a HNDA on the 14th of April 2021. The Foreword by Minister O'Brien notes that;

'in order to ensure that the plan-making system is supported by a robust methodology to inform policies and funding initiatives around housing and associated land requirements, a Housing Need and Demand Assessment (HNDA) Framework has been developed to support the preparation of housing strategies and all related housing policy outputs'.

The guidance document has been reviewed and utilised in the preparation of the HNDA, however as prescribed in the accompanying circular, the Housing Supply Target determined through applying the *Housing Supply Target Methodology for Development Planning* is used as the basis for this Housing Strategy. This approach is supported by the guidance document which states:

'In the case of Development Plans under preparation at the time of issue of this guidance, use the methodology outlined in the December 2020 'Housing Supply Target Methodology for Development Planning' guidelines to determine annual housing demand for the 6 years of the Plan'.

The guidance document refers to the function of the HNDA stating the following:

'The HNDA is designed to be the main evidence base from which estimates of housing need and tenure breakdown are to be calculated and consequently, from which housing policy is to be determined in the Housing Strategy, as well as influencing the relevant land use zoning objectives included within the Development Plan'.

The guidance document states that a HNDA framework *'is a standardised methodology that allows local authorities to assess local housing needs, existing and future, using consistent evidence bases and within a standardised framework'*. In relation to the process, the guidance document states that a *'specific HNDA Tool (developed and made available by the Department of Housing, Local Government and Heritage) is available for use by the local authority to assist in calculating the projected number of*

homes that are likely to be required to meet the estimated need over the determined period, broken down by tenure type’.

In relation to housing demand the guidance document states:

‘The analysis of demographic and housing affordability data and the conclusions drawn from it are used to produce an estimate of total additional housing units required to meet existing and future housing need and a breakdown of tenure type’.

The guidance document includes the following table as a summation of the HNDA preparation process:

1.	Decide the time period that the HNDA will cover
2.	Compile section 1 on Housing Market Drivers
3.	Compile section 2 on Housing Stock
4.	Select the scenarios to run in the HNDA Tool
5.	Having regard to the results from the HNDA Tool, compile section 3 on estimating total additional housing units required in the local authority area over the period selected and broken down into tenure type
6.	Compile section 4 on specialist housing need (including stakeholder consultation)
7.	When complete, sign off the HNDA (Director of Service for Housing and Director of Service for Planning)
8.	Incorporate the HNDA results into housing policy within the Housing Strategy

Table 2.5: HNDA Preparation Process Summary (Source: Guidance on the Preparation of a Housing Need and Demand Assessment).

The guidance document states that the default population projection scenario is the ‘Convergence scenario, which when combined with the default assumptions around Existing Need is consistent with the ‘Housing Supply Target Methodology for Development Planning, Guidelines for Planning Authorities’ issued under section 28 of the Planning and Development Act 2000 in December 2020’. The Convergence scenario is equivalent to the 50:50 city scenario adjusted for new housing supply since 2017, and to facilitate convergence to NPF strategy per the section 28 guidelines.

The guidance states that the Housing Strategy must include ‘measures that address the housing needs of the existing and future population of the area covered by the strategy. It should provide for more sustainable patterns of development by ensuring that as far as possible housing development is designed and located so as to make full use of public transport and to give access to education, employment, health and other services’.

Project Ireland 2040 – National Development Plan (NDP) 2018-2027

The National Development Plan will, through a planned capital investment of over €4.2 billion, support the delivery of some 40,000 new social housing homes by 2021. Direct Local Authority build, acquisitions, rejuvenation of formerly empty homes and provision by housing bodies are identified as the chief delivery mechanisms. By 2021, 12,000 social housing homes will be made available annually by Local Authorities and approved housing bodies for social housing. This level of provision is to be

maintained over the remainder of the period of the National Development Plan, resulting in 112,000 households having their housing needs met in a social housing home by 2027.

The NPF warns against the intensification of social housing properties in areas that are already dense with social housing and advocates the development of diverse neighbourhoods with a healthy balance of public and private housing.

Rebuilding Ireland – An Action Plan for Housing and Homelessness (2016)

The Action Plan published in 2016 aims to address the needs of homeless people and families in emergency accommodation, accelerate the provision of social housing, deliver more housing, utilise vacant homes and improve the rental sector. Rebuilding Ireland aims to increase residential house construction to 25,000 homes per annum and to deliver 47,000 units of social housing over the period of the Plan to 2021.

Actions to meet these objectives are organised under five pillars, each of which has a series of actions set out to address the opportunities and challenges presented by Ireland's housing sector. The five pillars are set out in the Action Plan for Housing and Homelessness as follows;

- Pillar 1 – Address Homelessness

Provide early solutions to address the unacceptable level of families in emergency accommodation; deliver inter-agency supports for people who are currently homeless, with a particular emphasis on minimising the incidence of rough sleeping, and enhance State supports to keep people in their own homes.

- Pillar 2 – Accelerate Social Housing

Increase the level and speed of delivery of social housing and other State supported housing.

- Pillar 3 – Build More Homes

Increase the output of private housing to meet demand at affordable prices.

- Pillar 4 – Improve the Rental Sector

Address the obstacles to greater private rented sector delivery, to improve the supply of units at affordable rents.

- Pillar 5 – Utilise Existing Housing

Ensure that existing housing stock is used to the maximum degree possible – focusing on measures to use vacant stock to renew urban and rural areas

The Action Plan for Housing and Homelessness pledged to support the enhanced role of existing Social Housing delivery initiatives and introduced the following new mechanisms and support schemes:

- Local Authority Construction & Acquisition (also known as the Social Housing Investment Programme (SHIP))

This programme provides funding to local authorities for the provision of social housing by means of construction and acquisition and covers expenditure under the Rapid Build Housing Programme, Part

V acquisitions, Land Aggregation Scheme and the Special Resolution Fund for unfinished housing developments.

➤ Capital Assistance Scheme (CAS)

To provide essential funding to Approved Housing Bodies (AHBs) for the provision of accommodation for persons with specific categories of housing need such as Homeless and Older Persons, People with Disabilities, Returning Emigrants and Victims of Domestic Violence.

➤ Vacant Housing Repair and Leasing Initiative:

This scheme enables local authorities, having identified appropriate vacant privately-owned properties in their functional areas, to provide upfront financial assistance to meet reasonable renovation works and to enter into long term lease arrangements with property owners. Renovation costs will be recouped from rent over an agreed period.

➤ Part V Delivery:

The Action Plan sets out a commitment to ensure adequate resources are made available to both local authorities and Approved Housing Bodies. This is to allow them to purchase or lease newly built private dwellings to the fullest extent envisaged by Part V of the Planning and Development Act 2000. In addition, where appropriate, the leasing of additional privately developed dwellings beyond the extent envisaged by Part V is supported. Furthermore, the up-front purchase of the Part V social housing requirement will be facilitated, subject to the introduction of strict controls.

Housing for All - a New Housing Plan for Ireland (2021)

'Housing for All - a New Housing Plan for Ireland' is the government's housing plan to 2030 stated as '*a multi-annual, multi-billion euro plan which will improve Ireland's housing system and deliver more homes of all types for people with different housing needs*'.

The policy has four pathways to achieving housing for all:

- Supporting home ownership and increasing affordability
- Eradicating homelessness, increasing social housing delivery and supporting social inclusion
- Increasing new housing supply
- Addressing vacancy and efficient use of existing stock

Each pathway includes a number of measures as set out below aimed at achieving housing for all.

Supporting Homeownership and Increasing Affordability

- Increased supply of new housing, up to an average of at least 33,000 per year to 2030
- An average of 6,000 affordable homes to be made available every year for purchase or for rent by Local Authorities, AHBs, the LDA and via a strategic partnership between the State and retail banks.
- A new Local Authority-led Affordable Purchase Scheme.

- A new, nationally available, affordable purchase shared-equity First Home scheme until 2025 for buyers of new-build homes in private developments.
- The LDA will be a new and important source of affordable housing on public lands, and will advance a new initiative, Project Tosaigh, to enhance the early delivery of new affordable homes.
- The LDA will deliver a significant number of homes on State lands, and in association with Local Authorities in major mixed tenure developments.
- Increased contribution by developers under Part V, up from 10% to 20%, to include affordable housing and cost rental housing.
- Launch of a newly expanded Local Authority Home Loan.
- Extended Rent Pressure Zone Protections to 2024 and rents linked to the Harmonised Index of Consumer Prices.
- Introduction of indefinite tenures for rent leases.
- Introduction of a new form of rental tenure called 'Cost Rental' homes.

Eradicating Homelessness, Increasing Social Housing Delivery and Supporting Social Inclusion

- Provide more than 10,000 social homes each year, with an average 9,500 newbuild Social Housing Homes to 2026.
- Through an updated 'Housing First National Implementation Plan', provide 1,200 tenancies over the next five years for people with a history of rough sleeping, or long-term use of emergency accommodation and who have complex needs.
- End long-term leasing of social housing by Local Authorities and AHBs through phasing out new entrants and focussing on new-build to provide social homes.
- Strengthen the Mortgage to Rent scheme to ensure it meets the needs of those in long-term mortgage arrears.
- Make improvements in the quality and quantity of Traveller-specific accommodation.
- Provide continued capital funding for housing for specific vulnerable cohorts, such as housing for older people and people with a disability, through the Capital Assistance Scheme and other social housing schemes.

Increasing new housing supply

- An annual average investment of in excess of €4bn in housing, through an overall combination of €12bn in direct Exchequer funding, €3.5bn in funding through the Land Development Agency (LDA) and €5bn funding through the Housing Finance Agency (HFA).
- Over 10,000 social homes and 6,000 affordable homes for purchase or rent per annum.
- State land bank to provide more land to the LDA to bring forward up to 15,000 homes and State to fund Local Authorities for land acquisition.
- In accordance with the National Planning Framework, focus on adequate supply of serviced zoned lands to meet housing need, at required density.
- Introduce updated Kenny Report style powers to ensure sharing of the increase in land values resulting from zoning decisions and more community gain.
- Introduce a new planning process for Large-Scale Residential Developments, to replace the Strategic Housing Development process.

- Establish Urban Development Zones, which will provide a coordinated, plan-led approach to the delivery of residential and urban development.
- Overhaul and simplify planning legislation to ensure certainty and stability.
- Bring forward reform of the Judicial Review process and introduce a new division of High Court for Planning and Environmental cases to reduce planning delays.
- Introduce a new tax to activate vacant lands for residential purposes, to replace the Vacant Site Levy.
- Provide a New Fund, Croí Cónaithe (Cities) to address acute viability challenges in urban areas that are curtailing home ownership.
- Increase skills and capacity to deliver an average of 33,000 homes per year.

Addressing vacancy and efficient use of existing stock

- A new Croí Cónaithe (Towns) Fund for servicing sites for new homes in regional towns and villages and to support refurbishment of vacant houses. Public infrastructure agencies, such as Irish Water, and local communities will work to provide serviced sites for housing. This will help attract people to build their own homes and live in small towns and villages.
- Energy retrofit supports to refurbish older vacant stock.
- Support for Local Authorities to purchase and resell up to 2,500 of the identified vacant properties in their areas. Compulsory Purchase Order (CPO) powers will be used where necessary. Local Authorities will be supported by Housing Finance Agency funding.
- Reform the 'Fair Deal' Scheme (the scheme that provides financial support to those in long-term nursing home care) to incentivise people in long-term care to rent or sell their property.
- Establish new controls on short-term lettings.
- Collect data on vacancy with a view to introducing a new Vacant Property Tax.
- Planned management and maintenance of Local Authority housing stock.
- Incentivise the refurbishment and extension of vacant properties in towns or villages, for example, through energy retrofit supports and the Urban Regeneration Development Fund (URDF) / Rural Regeneration Development Fund (RRDF) and other mechanisms.

National Vacant Housing Reuse Strategy 2018-2021

The National Vacant Housing Reuse Strategy was published in 2018 to support Pillar 5 of the Rebuilding Ireland: Action Plan for Housing and Homelessness. The strategy sets the objective to maximise the use of our existing housing stock focusing on measures to use vacant stock to renew urban and rural areas. The Strategy sets out a range of actions, grouped under five key objectives as follows:

- Objective 1: Establish robust, accurate, consistent and up-to-date data sets on vacancy.
- Objective 2: Bring forward measures to ensure, to the greatest degree possible, that vacant and underused privately owned properties are brought back to use.
- Objective 3: Bring forward measures to minimise vacancy arising in Social Housing Stock.
- Objective 4: Continued engagement with and provision of support to key stakeholders to ensure suitable vacant properties held by banks, financial institutions and investors are acquired for social housing use.

- Objective 5: Foster and develop cross-sector relationships, collaborating in partnership to tackle vacant housing matters.

Social Housing Strategy 2020

The Social Housing Strategy 2020 sets out the framework for the delivery of new social housing and for social housing assessment, delivery and financing. The Strategy is based on three pillars:

- Pillar 1: Provide for 35,000 new social housing units, over a six-year period, to meet the additional social housing supply requirements as determined by the Housing Agency;
- Pillar 2: Support up to 75,000 households through an enhanced private rental sector; and
- Pillar 3: Reform social housing supports to create a more flexible and responsive system.

Phase 1 sets a target of 18,000 additional housing units and 32,000 HAP/RAS units by the end of 2017. Phase 2 sets a target of 17,000 additional housing units and 43,000 HAP/RAS units by end 2020.

Urban Regeneration and Housing Act 2015

The Act provides that where a residential scheme is greater than 9 units developers are obliged to set aside 10% of the scheme for social or affordable housing for local authorities. The option of making of payment in lieu of social housing is no longer available.

Provision has been made for the transfer of residential units outside the lands which are subject to planning permission, but within the relevant Development Plan area. The social housing delivery options now permitted are the transfer of ownership of lands, transfer of completed social housing units on the land, transfer of ownership of completed social housing units on other land, not subject to the planning permission.

There is no longer a requirement for the developer to build housing units on other land to fulfil their Part V obligations. The Part V obligation can now be fulfilled by developers through long term leasing of properties and a combination of the Part V options above is also allowed.

A vacant site levy was also introduced, charged each year from 1 January 2018 and will be payable in arrears each year from 1 January 2019. It provides Local Authorities with the power to apply levies to property owners who do not take steps to develop vacant and under-utilised in areas identified for priority development under the local Development Plan.

National Housing Strategy for People with a Disability (2011-2016)

The National Housing Strategy for People with a Disability 2011 – 2016 was published in October 2011. The Strategy sets out the Government's broad framework for the delivery of housing for people with disabilities through mainstream housing options. The Strategy has also been affirmed in the Action Plan for Housing and has been extended to deliver on its aims and continue to guide and progress policy.

The strategy has nine strategic aims:

1. To promote and mainstream equality of access for people with a disability to the full range of housing options available suited to individual and household need.
2. To develop national protocols and frameworks for effective interagency cooperation which will facilitate person-centred delivery of housing and relevant support services.
3. To support people with a disability to live independently in their own homes and communities, where appropriate.
4. To address the specific housing needs of people with an intellectual and/or physical disability, moving from congregated settings in line with good practice, including through the development of frameworks to facilitate housing in the community.
5. To address the specific housing needs of people with a mental health disability, including through the development of frameworks to facilitate housing in the community, for people with low and medium support needs moving from mental health facilities, in line with good practice.
6. To consider good practice in the design, coordination and delivery of housing and related supports.
7. To facilitate people with a disability to access appropriate advice and information in respect of their housing needs.
8. To improve the collection and use of data/information regarding the nature and extent of the housing needs of people with a disability.
9. To provide a framework to support the delivery, monitoring and review of agreed actions.

Design Standards for New Apartments - Guidelines for Planning Authorities (December 2020)

The Ministerial Letter to Local Authorities accompanying the updated Section 28 Guidelines on Design Standards for New Apartments have been issued to give effect to restrictions on Co-living Development. The updated apartment guidelines now include a Specific Planning Policy Requirement (SPPR) for a presumption against granting planning permission for co-living/shared accommodation development, and replace the previous 2018 guidelines. The December 2020 changes solely relate to the 'Shared Accommodation' (Co-living) aspects of the guidance.

The Ministers Foreword within the updated guidelines states:

'I concluded that given the scale, location and potential impact of co-living development permitted to date, as well as the local authority-led Housing Need and Demand Assessment (HNDA) process that is being developed by my Department, that there are sufficient shared accommodation/co-living units either permitted or subject to consideration within the planning system, that may be built out to demonstrate and prove this concept, without impacting the housing system'.

The Apartment Guidelines contain a number of specific planning policy requirements, which take precedence over policies and objectives within Development Plans, Local Area Plans and SDZ planning schemes.

Specific Planning Policy Requirement 1 states:

'Housing developments may include up to 50% one-bedroom or studio type units (with no more than 20-25% of the total proposed development as studios) and there shall be no minimum requirement for apartments with three or more bedrooms. Statutory development plans may specify a mix for

apartment and other housing developments, but only further to an evidence-based Housing Need and Demand Assessment (HNDA), that has been agreed on an area, county, city or metropolitan area basis and incorporated into the relevant development plan(s)'.

The guidelines state that into the future, a majority of households will comprise 1-2 persons and approximately half of the remainder will be three person households, and notes it is critical to accommodate the needs of increasingly more diverse household types in the context of a growing and ageing population.

2.2 Regional Policy

Regional Spatial and Economic Strategy for the Southern Region

The Regional Spatial and Economic Strategy (RSES) provides a high-level development framework for the Southern Region that supports the implementation of the National Planning Framework (NPF) and the relevant economic policies and objectives of Government. The RSES includes *'Regional Policy Objectives'* which set out a suite of regional development objectives that provide a long term strategic planning and economic framework for the development of the region, and in turn set the framework for city and county development plans. The RSES also includes a Metropolitan Area Strategic Plan (MASP) for Waterford which provides a *'high level strategic framework for the sustainable development of the Waterford Metropolitan Area'*.

The RSES states that *'the Southern Region represents over 40% of Ireland's total landmass and one third of the national population. With three of the country's five cities - Cork, Limerick and Waterford and a network of large towns, the region has a strong urban structure'*.

The region is divided into three sub-regional areas, called Strategic Planning Areas (SPAs) with Waterford located in the South-East SPA.

Figure 2.1: RSES Map 1.1 Southern Region & Strategic Planning Areas (SPAs)

The RSES notes that the Southern Region contains one-third of the State's population (1.6m) and is the second most populated Regional Assembly area. The highest rates of population increase were in commuter areas near to Cork and Limerick Cities and in areas close to other larger settlements. Population decline was experienced, primarily in rural and peripheral areas, with the largest decreases recorded in areas of Clare, Kerry, Limerick and Cork. Population decline was also evident in areas within Cork, Limerick and Waterford Cities.

The policies in the RSES are structured under Regional Policy Objectives (RPOs) and Metropolitan Area Strategic Plan (MASP) Policy Objectives. Relevant RPOS and objectives within the MASP have informed the development of this Housing Strategy for Waterford City and County Council.

In relation to regional strategy, Regional Policy Objective 2 (RPO 2) states *‘the overall strategy builds on cities and their associated metropolitan areas as engines of growth and seeks, in parallel, to re-position the Region’s strong network of towns, villages and diverse rural areas in an economically resilient, imaginative and smart way to foster sustainable competitive advantage’.*

Figure 2.2: Southern Region Strategy Map

RPO 10 relates to compact growth in the metropolitan areas and seeks out to *‘prioritise housing and employment development in locations within and contiguous to existing city footprints where it can be served by public transport, walking and cycling’.*

RPO 35b states that *‘Development Plans shall set out a transitional minimum requirement to deliver at least half (50%) of all new homes that are targeted in the Region’s three Cities and suburbs of Cork, Limerick and Waterford, within their existing built up footprints in accordance with NPF National Policy Objective 3b. This will be evidence based on availability and deliverability of lands within the existing built up footprints’.*

Waterford MASP

The MASP provides a high level strategic framework for the sustainable development of the Waterford Metropolitan Area based on the ambition for the City and Metropolitan area as an innovation-centred, enterprising, University City with a diverse population, a vibrant cultural sector, a thriving economy, and a significant and substantial profile that brings European and international recognition.

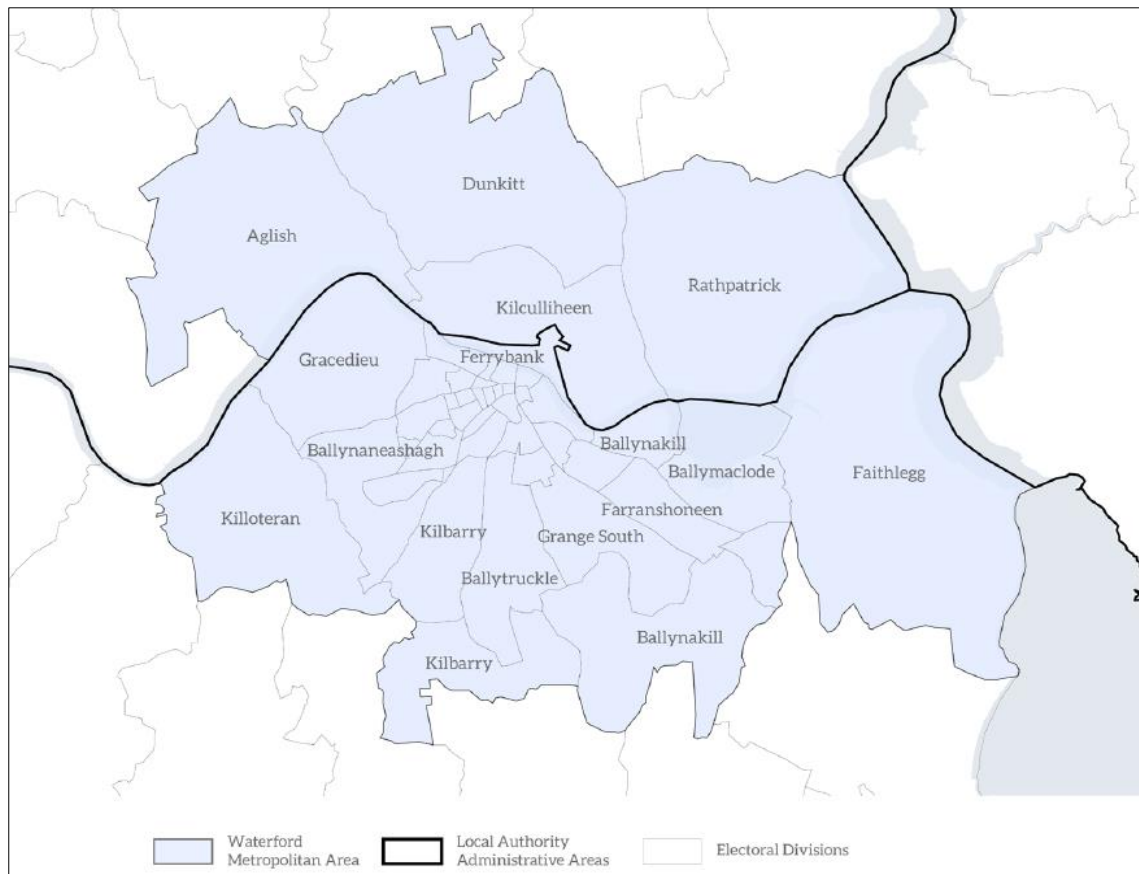

Figure 2.3: Waterford Metropolitan Area

The MASP notes that clarification has been received from the Department that the 25% Headroom identified in the NPF Implementation Roadmap can apply to the County Kilkenny area of the Waterford Metropolitan Area.

The NPF Enablers identified for the Waterford MASP include identifying infill and regeneration opportunities to intensify housing and employment development throughout city centre and inner suburban areas.

The MASP reiterates the NPF requirement that 50% of all new housing within Waterford City and Suburbs is to occur within its existing footprint, through brownfield, infill and regeneration. Outside of Waterford City and Suburbs, 30% of all new homes targeting settlements is to occur within their existing built-up footprints as per National Policy Objective 3 (c) of the NPF.

Waterford MASP Policy Objective 8 relates to Housing and Regeneration and states the following:

‘a. It is an objective to support the high-quality compact growth of Waterford City Centre and suburban areas, the assembly of brownfield sites for development and the regeneration and redevelopment of Waterford City Centre to accommodate residential use. The MASP will support initiatives which facilitate compact growth and which promote well designed high-density residential developments which protect amenities and in the city centre and suburban areas.

b. It is an objective to ensure investment and delivery of comprehensive infrastructure packages to meet growth targets that prioritises the delivery of compact growth and sustainable mobility in accordance with NPF and RSES objectives’.

2.3 Local Policy

Waterford City & County Council Traveller Accommodation Programme (TAP) 2019-2024

The Housing (Traveller Accommodation) Act 1998 amends and extends the existing Housing Acts and places a statutory obligation on WC&CC in relation to, inter alia, the following:

- 1) To prepare and adopt a Traveller Accommodation Programme (TAP), subject to periodic review, for the provision of Traveller Accommodation in the County.
- 2) To provide for a public notification and consultation process in respect of the preparation of the TAP, including an opportunity to comment on draft programmes.
- 3) To take reasonable steps to secure the implementation of the TAP in the County.
- 4) To provide for the establishment of a Local Traveller Accommodation Consultative Committee to facilitate consultation with Travellers about the preparation and implementation of Traveller Accommodation Programme.
- 5) To extend to halting sites the powers available to local authorities under the Housing (Miscellaneous Provisions) Act, 1997 relating to anti-social behaviour and estate management.

The Policy Statement in the TAP states that it *'is the policy of Waterford City and County Council to endeavour to provide accommodation appropriate to the needs of Traveller households who live in the area, who are approved applicants for accommodation by the Council and who are included in the assessment of need in the preparation of this programme. Approved housing applicants of Waterford City and County Council are all applicants who are assessed as having an accommodation need'*.

The TAP notes that the assessment of need for the Traveller Accommodation Programme 2014-2018 was carried out as two separate assessments by Waterford City Council and Waterford County Council (including the assessment of need for the Dungarvan Town Council Area).

The TAP is discussed in greater detail in Section 5 of this report.

Waterford Age Friendly Alliance City and County Strategy 2017-2022

Ireland's National Age Friendly City and Counties programme *'is part of this worldwide initiative which aim to make sure that as we age, we all can have a real say in what happens in our own lives, what happens in the areas in which we live, enjoy good health, excellent services, live in a safe environment, and participate fully in everything that is going on in our Communities'*.

The Waterford Age Friendly Strategy was developed as a result of consultation with the older people of Waterford and with the agencies and service providers involved in the delivery of services to older adults throughout the County.

The Waterford Age Friendly Strategy is structured under nine key themes that underpin the work of the Alliance during the lifetime of the strategy:

- *'Respect and Social Inclusion*
Defined as: 'ensuring that as people age they feel valued and respected'
- *Social Participation*

Defined as: 'ensuring that as people age they can participate in social, economic and public life'

- *Civic Participation and Employment*

Defined as: 'ensuring that as people age they are able to learn, develop and work'

- *Home Environment*

Defined as: 'ensuring that as people age they can stay in their own homes and communities'

- *Health/Active Living*

Defined as: 'ensuring that as people age they can live healthier, active lives for longer'

- *Transportation*

Defined as: 'ensuring that as people age they can get where they need to go when they need to go'

- *Built and Natural Environment*

Defined as: 'to ensure that as people age they are enabled by the built and social environment'

- *Safer Communities*

Defined as: 'to ensure that as people age they are safe at home and when out and about'

- *Communication and Information*

Defined as: 'to ensure that as people age they have the information they need to live full lives''.

In relation to the theme of housing and home, a strategic action is listed which aims *'to provide suitable housing for Older People and people with specific needs and requirements in sustainable age friendly communities'*.

The consultation process for the strategy revealed a *'huge need for Bungalows to allow older people to downsize/move to more suitable accommodation with downstairs bathroom/level access showers'*.

3.0 Current Contex

3.0 Current Context – Housing Market Drivers

3.1 Population

Regional Context

County Waterford is located within the Southern Regional Assembly (SRA) area, a region with approximately one third of the state’s population (1,585,906) and c. 42% of Irish state territory. The RSES for the SRA notes the region has a strong urban structure, with three of the country’s five cities and a network of large towns.

The RSES notes that all 10 local authority areas in the Southern Region have experienced growth at varying levels since 2006, and between 2006 and 2016, the highest rates of population increase were in commuter areas near to Cork and Limerick Cities and in areas close to other larger settlements.

The RSES states that in 2016, the three cities and suburbs accounted for 22% of the Region’s total population, and growth in the cities and suburbs within the region outpaced overall Regional and State level growth from 2011-2016. The Southern Region grew by 9.9% between 2006 and 2016, an additional 142,910 people. Cork County has been the primary beneficiary of population growth within the region over the period with an increase of 55,334 (15.3%).

In relation to the demographics of the region, the RSES notes that the overall age structure for the Region mirrors that of the State. Population projections anticipate large increases in the 15-24 year (+26%), 45–64 year (+14%) and 65+year (+56%) age groups between 2016 and 2031. The 0-14 year and 25-44 year age groups are projected to decrease by approximately 14%.

Table 3.1: County population change 2006 – 2016 (SRA Region) (Source: Table 1.3 Regional Spatial and Economic Strategy for the Southern Region (RSES))

Waterford

A socio-demographic indicator profile of Waterford City and County compiled by AIRO (All-Island Research Observatory) in 2020 notes that Waterford's population of 116,176 represents 2.4% of the State's population and that Waterford is the 19th most populated local authority in Ireland and is the 3rd most populous county in the South-East with both Tipperary (N+S 159,553) and Wexford (149,722) with higher populations.

The profile by AIRO notes that Waterford's population has grown consistently and steadily since 1996, with an increase of 22.7% (21,496) observed over twenty years (1996-2016). This increase is lower than the State average of 31.3%. Growth rates in Waterford over previous decades have been much lower at 8.5% between 1979 and 1996, and 12.9% between 1971 and 1979.

Figure 3.1: Total Population County Waterford - 1951 to 2016 (Source: Figure 1.2: A socio-demographic indicator profile of Waterford City and County, AIRO, 2020)

Analysis of census data reveals the population of County Waterford grew by 5.4% (5,834) from 2006 to 2011, with a marked slowdown in growth to 2.1% (2,381) in the following intercensal period (2011-2016) corresponding with a period of national economic contraction experienced post 2008. The rate of population increase in Waterford is lower than the Southern Regional Assembly average (+26.3) with Wexford (+43.5%), Carlow (+36.8%) and Kilkenny (+31.7%) all recording higher levels of growth.

Census 2016 reveals that the national population increased by 3.8% (173,613) from 2011 to 2016, revealing that County Waterford's growth was below the national growth figure. Of the 173,613 national increase, 138,899 was in urban areas, or 80 per cent². The historical growth figures provide some context for the determination of future population projections.

Figure

3.2: Population Change, 1996 to 2016 (Source: AIRO & CSO)

The AIRO profile provides detailed population analysis for County Waterford sourced from the CSO. It notes that the Waterford City Municipal District (MD) is the largest in terms of population with a total population of 67,835 accounting for 58.4% of the population in the county. The Comeragh MD is the smallest and accounts for 14.7% of the county population.

The Waterford MASP area has a total population of 59,854. Of this number, 51,615 (86.2%) are located in Waterford and account for 44.4% of the total population in the county. The remaining 8,239 (13.8%) of the MASP total reside in County Kilkenny. The Key Town of Dungarvan has a population of 10,388, with Tramore at 10,381.

Table 3.2: Population Breakdown of County Waterford, 2016 (Source: AIRO/CSO)

Demographics

The breakdown of population in County Waterford as of Census 2016 is 58,525 females and 57,651 males, with 29,347 children recorded.

The total dependency ratio in County Waterford (proportion of the population aged 0 to 14 and over 65 as a percentage of the total population) is 36.1%. The dependency rate in County Waterford has increased by 4.1% (1,657) from 2011 to 2016 and is the 17th highest rate in the state.

Age Dependency	0-14 Years	15-64 Years	Over 65 Years	Young Age Ratio (%)	Old Age Ratio (%)	Total Dependency Ratio (%)
Persons	24,545	74,260	17,371	21.1%	15.0%	36.1%

Table 3.3: Age Dependency Ratio 2016 (Source: CSO)

The AIRO profile notes there are six settlements which have a dependent population greater than 500: Waterford City and Suburbs (16,510 or 52.1%), Dungarvan/Ballinroad (3,794 or 57.5%), Tramore (3,868 or 59.4%), Dunmore East (638 or 54.5%), Portlawn (655 or 60.3%) and Lismore (534 or 60.3%). The highest dependency rate is Villierstown at 72.5%.

In 2016, the top two counties with the highest old dependency ratios were Mayo (28.3) and Leitrim (27.4). The counties with the lowest old dependency ratios were Fingal (13.8) and Kildare (15). The Old Age Dependency Ratio is the ratio between the number of persons aged 65 and over and the number of persons aged between 15 and 64. This ratio is increasing nationally, with the figure rising from 17.4% in 2011. This trend has implications for housing and service provision.

3.2 Existing Housing Stock and Supply

A socio-demographic indicator profile of Waterford City and County was compiled by AIRO (All-Island Research Observatory) in 2020. The objectives of the study was to provide Waterford City and County Council with a wide range of socio-economic and spatial datasets, providing an evidence baseline that can support a number of spatial planning initiatives such as the review of the Development Plan for Waterford City and County. Chapter 2 of the study provides a Housing Profile which has been utilised extensively in the preparation of this Housing Strategy.

Existing Housing Stock and Composition

Census 2016 records a total housing stock of 43,549 units in County Waterford. The number of vacant units in 2016 stood at 5,194 (excluding holiday homes and those dwellings deemed to be temporarily absent). The housing vacancy rate (recorded through Census 2016) of 9.9% of the total stock within the county is higher than the state average of 9.1%.

The Waterford City and County Council Vacancy Taskforce Assessment Report which included a pilot field-based survey reports a lower vacancy rate of 4.4%. The total number of properties surveyed was 986 and the properties identified as vacant in both waves of inspections was 43.

The survey notes that *“the level of long term vacant residential dwellings that can potentially be reactivated into the liveable housing stock may be somewhat less than originally supposed”*. In addition, it states that *“a number of the properties identified as potentially long-term vacant would not be in areas that are of high demand or suitable for the social housing model”*. The pilot required

two visual inspections, six months apart, with those houses occupied between the two inspections disregarded. In the Small Area Survey Sample of 9 areas across Waterford City, the sample survey indicates lower vacancy recordings than the published data from Census 2016.

Small Area Survey Sample	Census 2011			WCCC Sample Survey 2016			Census 2016		
	Total Stock	Vacant	Vacancy Rate	Total Stock	Vacant	Vacancy Rate	Total Stock	Vacant	Vacancy Rate
9 Small Areas in Waterford City	1076	196	18.2%	1071	95	8.9%	1076	146	13.6%

Table 3.4: Waterford City Sample Survey of Vacancy (Vacancy Taskforce Assessment Report)

The AIRO profile notes a wide variation in vacancy rates across the settlements within County Waterford with recorded rates ranging from 4% (Dunmore East) to 22.7% (Cappoquin). Three settlements have more than 20% of housing units classed as vacant (less holiday homes): Cappoquin (22.7%), Kill (21.6%) and Kilmeaden (20.3%). Within the Urban Towns, Lismore has a rate of 16.2% which is more than double the rate of other settlements.

Census 2016 was the first census where data on the type of vacant dwelling was captured³. There were 2,142 holiday homes recorded in County Waterford

County Waterford - Occupancy Status	Total Dwellings
Occupied	43,719
Temporarily Absent	1,436
Unoccupied Holiday Homes	2,142
Other Vacant Dwellings	5,194
Total	52,491

Table 3.5: Occupancy Status of permanent dwellings in County Waterford (Census 2016)

Housing Tenure

The total number of households was c43,455 and the proportional breakdown of housing tenures, privately owned, privately rented and publicly rented accommodation in County Waterford is set out in Table 3.6 and Table 3.7 (as sourced from Census 2016). As can be seen home ownership in the county stood at 66.8% in 2016.

County Waterford	Owner occupied with mortgage	Owner occupied with no mortgage	Rented from a Landlord (including voluntary/co-op body)	Rented from Local Authority	Occupied free of rent	Not Stated	Total
No. of Households	12,917	16,134	7,254	5,087	696	1,367	43,455
% Households	29.7%	37.1%	16.7%	11.7%	1.6%	3.1%	

Table 3.6: Household Occupancy in County Waterford 2016 (Census 2016)

³ <https://www.cso.ie/en/releasesandpublications/ep/p-cp1hii/cp1hii/vac/>

Home ownership remains the dominant tenure in County Waterford as evident from the Census data in Table 3.6 and 3.7. Of this cohort 29.7% of households pay a mortgage, with 37.1% mortgage free.

Occupancy Tenure	Households	Household %
Owner Occupied	29,051	67%
Rented (Privately)	7254	17%
Social Housing	5,087	12%
Occupied free of rent or not stated	2063	5%
Total	43,455	

Table 3.7: Household Tenure in County Waterford (Census 2016)

Household Size

Household size cohort represents the number of people per households. 55.7% of households are 1 and 2 person households, as illustrated below in Table 3.8.

No. People per Household	Households	Persons	Households %	Persons %
1-person household	11,355	11,355	26.1%	9.9%
2-person household	12,890	25,780	29.6%	22.5%
3-person household	7,342	22,026	16.9%	19.3%
4-person household	6,766	27,064	15.5%	23.7%
5+ person household	5,196	28,177	11.9%	24.6%
Total	43,549	114,402		

Table 3.8: Household Size in County Waterford (Census 2016)

Compositionally, there were 43,549 households and an average household size of 2.67, which is marginally lower than the national rate of 2.75.

Figure 3.3: Household Size in County Waterford (Census 2016)

3.3 Unfinished Housing Development

The 2017 National Housing Development Survey which tracks progress on unfinished housing developments since 2010 indicates that there were 8 unfinished housing developments in County Waterford in 2017. Construction activity was ongoing on 2 of the sites at the time of the survey. According to the survey there were 7 vacant units spread across the developments.

Following the inspection of the 8 unfinished housing development sites in 2017, the number of unfinished housing developments was reduced to 5, a reduction of c.62% from 2016 to 2017. This information was published in the 2017 Annual Progress Report on Actions to Address Unfinished Housing Developments.

3.4 Housing Permissions

A detailed analysis of trends in planning permissions is included in Section 5.2 herein. In relation to trends in planning permissions for residential units, the proportion of one off housing as a percentage of overall housing granted had been in decline since 2015, standing at 13.3% in 2019. An increase in percentage terms is noted in 2020, which may relate to the impacts of Covid-19 on completions of larger schemes. The quantum of one off houses permitted annually (and indeed overall residential permissions) can be observed to trend to some degree with economic performance, with lower numbers observed during the economic recovery phase in the early to middle part of the last decade.

Figure 3.4 below details units granted planning permission by type, illustrating that multi—unit housing developments have been the most prominent type in recent years. Apartments/private flats have started to become a more substantial proportion of overall permissions in recent years.

This data is sourced from the Central Statistics Office (CSO).

Figure 3.4: Household Size 2016

3.5 Social Housing

The Summary of Social Housing Assessments 2020 brings together information provided by local authorities on households in their functional area that are qualified for social housing support but whose social housing need is not currently being met. It is a point-in-time assessment of the identified need for social housing support across the country.

The summary document notes an increase of 15.8% in the number of households qualifying for social housing support was recorded in Waterford City and County from 2019 to 2020, an increase of 173. This is noted as the largest increase in the country over the period.

The largest cohort of applicants is within the 30-39 age bracket (main applicant) at 365. There were 37 applicants aged 70 +, and 194 applicants aged less than 25.

Figure 3.5: Age Profile of Households (Main Applicant)

3.6 Employment Rates

Waterford is located within the South-East NUTS III region which has the highest level of unemployment across Ireland’s eight NUTS III regions. The figures for Q3 2020 show a State unemployment level of 7.1% and a level of 7.7% in the South-East Region.

Analysis of Census 2016 reveals that the total number of the Labour Force classed as Unemployed in Waterford is 8,323 and accounts for 15.4% of the labour force within the county. This rate is higher than the State average of 12.9%. This accounts for 2.8% of those unemployed in the State (297,396) and 8.6% of those unemployed in the Southern Regional Area (97,103).

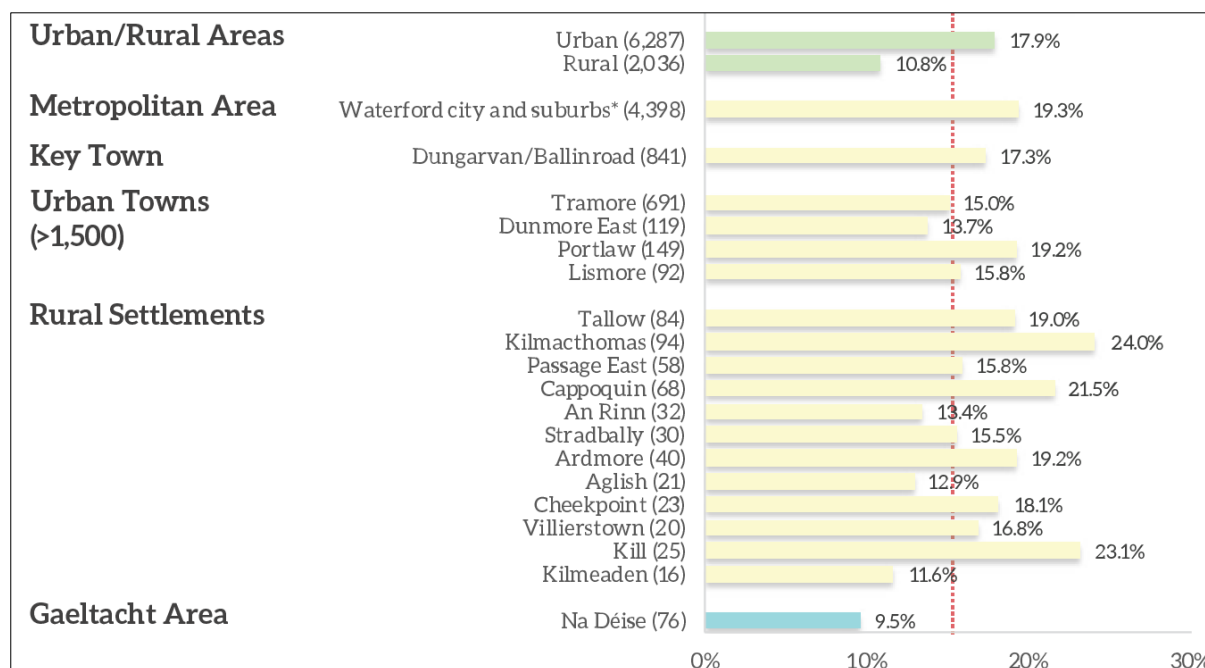

Figure 3.6: Labour Force Unemployed (PES), 2016 (Source: AIRO/CSO)

A socio-demographic indicator profile of Waterford City and County compiled by AIRO (All-Island Research Observatory) in 2020 provides further analysis of the employment situation in the county, noting that the Labour Force Unemployment Rate in Waterford at 15.4% is significantly lower than the Waterford MASP rate of 18%. Figure 3.6, sourced from the AIRO report, compares the labour force unemployment rate across the various tiers of the settlement hierarchy within County Waterford.

Unemployment rates range from 11.6% in Kilmeaden to 24% in Kilmacthomas. Urban areas in Waterford recorded a higher rate of 18.3% (6,287) when compared with rural areas which had a rate of 10.8% (2,036).

Within the MASP area the highest rates of labour force unemployment are in central areas of Waterford City in areas such as Larchville, Kingsmeadow and Poleberry.

4.0 Housing Need Demand Assessment

4.0 Housing Need Demand Assessment

This section of the Housing Strategy includes the determination of housing requirements in Waterford over the lifetime of the development plan. Demographic, economic and social inputs have been examined and utilised to estimate projected population, households and associated housing needs in County Waterford between the 2022 and 2028 lifetime of the plan. The time period that the HNDA covers in this instance aligns with the plan period.

This section builds on the analysis of the current housing context in Section 3 which considered the existing housing stock and composition, housing tenure, planning permissions for housing and the existing social housing stock. Section 4 seeks to project and determine the future housing requirements over the plan period. This section is structured according to the stages outlined below in Table 4.1.

Stage	
1.	Determination of Annual Population Projections
2.	Determination of Average Household Size and Additional Households Required
3.	Calculation of Estimated Distribution of Household Disposable Incomes
4.	Calculation of Average Annual Household Disposable Income Distribution
5.	Calculation of Average Monthly Household Disposable Income Distribution
6.	Determination of Distribution of Total Anticipated Households
7.	Determination of Distribution of Additional Households
8.	Calculation of Projected House Price Bands
9.	Calculation of Mortgage Capacity of Households
10.	Calculation of Projected Needs for Ownership
11.	Calculation of Ability to Access Private Rental
12.	Summary of Projected Social Housing Needs

Application of NPF population and housing projections into the development plan

Guidance issued under Section 28 of the Planning and Development Act (*Housing Supply Target Methodology for Development Planning - Guidelines for Planning Authorities (2020)*) provides a methodology for the application of NPF population and housing projections into local authority plan processes (Table 1 of the guidelines).

The guidelines state that the identified NPF 50:50 City scenario is the recommended housing demand scenario to be used by planning authorities in their planning functions, and this approach is illustrated in Table 1 within the guidelines and through a number of worked examples.

The Waterford County Development Plan period will run from Q3 2022 – Q2 2028, and the methodology provided in the Section 28 guidelines have been applied to this six-year local authority development plan period. The methodology provided in the guidelines (in addition to the worked examples set out in Appendix 1 of the guidelines) has been utilised in Table 4.2 below to calculate the housing demand for the development plan period.

The projected NPF 50:50 housing demand scenario for County Waterford has been utilised as required by the guidelines. The actual new housing supply from 2017 to Q2 2021 is sourced from CSO completions data, and an assumption/estimation has been made on housing completions up to Q2 2022 in the county as required by the methodology (estimation is based on analysis as discussed further below). The convergence adjustment applied to the methodology (as provided for in Section 28 guidelines) is utilised as the ESRI NPF scenario for Waterford is higher than the ESRI Baseline scenario.

Table 4.2 below calculates the housing demand for the 6 year development plan period, providing a figure of 4,824. The source of the figures utilised is indicated (where applicable). Data from the CSO (including Census 2016), the Department of Housing, Local Government and Heritage (DHLGH), and the Economic and Social Research Institute (ESRI) was utilised as prescribed in the guidelines.

Waterford City & County Council		Annual Average Households	Total Households	
A	ESRI NPF scenario projected new household demand 2017 to Plan end year, or quarter (pro rata) - Q2 2028	Total Projection/relevant time period 608 (6,991/11.5)	Total Projection 6,991 ^A	From ESRI Research
B	Actual new housing supply 2017 to - Q2 2022, most recent available year or quarter prior to Plan commencement (estimated future delivery projected based on analysis)	Total completions/relevant time period 402 (2,209/5.5)	Total Completions 2,209 ^B	From CSO Completions data
C	Homeless households (latest data), and unmet demand as at most recent Census	N/A	Total existing unmet demand 164 ^C	From DHLGH and Census
D	Plan Housing Demand = Total (A-B+C) (Projected ESRI NPF demand - new completions + Unmet demand)	Plan total demand/6 years 782 (4692/6)	4,946	
E	Potential adjustment 1 to end 2026 portion of plan period to facilitate convergence to NPF strategy (where justified)	Mid-point between ESRI NPF and baseline scenarios to 2026 in lieu of A above	Adjusted Total Demand	
E1	ESRI Baseline scenario projected new household demand 2017, to Q4 2026	576 (5,757/10)	5,757	From ESRI Research
E2	ESRI NPF scenario (50:50) projected new household demand 2027 - Q2 2028	-	990	From ESRI Research
E3	Mid-point between A-E1 (ESRI NPF and Baseline scenarios to Q4 2026)	588 (5,879/10)	$(6,991^A - 990^{E2} + 5,757^{E1} / 2) = 5,879$	
E4	Adjusted Total Plan Demand calculation based on E2 + E3 in lieu of A above	804 (4,824/6)	$990^{E2} + 5,879^{E3} - 2,209^B + 164^C = 4,824$	

Table 4.2: Methodology for the application of NPF population and housing projections into Waterford City & County Development Plan 2022-2028

As noted above, the adjustment allowed for in the S.28 guidelines 'Housing Supply Target Methodology for Development Planning' have been applied to facilitate convergence to the NPF strategy (i.e. Adjustment 1).

Housing supply data was available to Q2 2021 from the CSO and a projection was undertaken to Q2 2022 to calculate the actual new supply figure (Row B) from 2017 to Q2 2022. Projections for future housing delivery are based upon analysis of available completion data in the county, the restart of

construction following Covid 19, analysis of commencement notices in the county and forecasts provided by the ESRI in their Summer 2021 Quarterly Economic Commentary⁴.

The ESRI have revised their forecasts upwards from their spring forecast of 15,000 new dwelling completions in 2021 and 16,000 in 2022, stating the following: “Overall, given that construction activity resumed partly in mid-April and in full by May, we revise our previous forecast regarding new dwelling completions and now expect that a total of 18,000 new dwellings will be delivered in 2021, while for 2022 we forecast a return to the pre-pandemic levels with 21,000 completions”. The ESRI also note that a total of 1,530 commencements were registered in the first two months of 2021, almost 65 per cent less compared to the first two months of 2020.

CSO completions data (available at the time of writing) provides the total for the county from 2017 to Q2 2021 as 1,832. Projections from this point out to Q2 2022 provide an additional 377 units providing a total new housing supply of 2,209 from 2017 - Q2 2022. The development plan housing demand figure has informed this Housing Strategy and further calculations outlined herein.

4.1 Determination of Annual Population Projections

As noted herein, the Implementation Roadmap for the National Planning Framework published in July 2018 provides transitional population projections as a range for each county. It plots a growth trajectory set approximately mid-way between what is currently being planned for constituent statutory County / City Development Plans if projected forward to 2031, and the more likely evidence based and nationally coherent projected scenario to 2031 and 2040. These ‘adjusted’ transitional figures apply to 2026 and will also inform the period to 2031.

Section 28 Planning Guidelines (*Housing Supply Target Methodology for Development Planning*) released in December 2020 note that the ‘established NPF Roadmap population projections for each county continue to be the population parameters for local authority development planning processes. City or County development plans must therefore plan for the identified population growth within these estimates and use them as the basis for strategic decision-making in their development plan process, including its core strategy, settlement strategy and housing policies’.

In the case of County Waterford, the roadmap provides a population projection of 132,000-135,000 for 2026, and 137,000-144,000 for 2031. These transitional population projections have been rounded to the nearest 500 persons and expressed as a range with 20% variation.

South-East	2016 Population	2026 Projection	2031 Projection
Waterford	116,000	132,000-135,000	137,000-144,000
Wexford	149,000	163,000-166,000	169,000-172,500
Kilkenny	99,000	108,000-110,000	112,000-114,500
Tipperary SR	88,500	96,000-98,000	99,500-102,000
Carlow	57,000	62,000-63,000	64,000-65,500
Subtotal	509,500	561,000-572,000	581,500-598,500

Table 4.3: Transitional Regional and County Population Projections to 2031 (Source: Implementation Roadmap for the National Planning Framework, 2018).

⁴ K. McQuinn, K., O’Toole, C., Kostarakos, I., and Coffey, C. (2021). Quarterly Economic Commentary - Summer 2021. Economic and Social Research Institute (ESRI).

The Regional Spatial and Economic Strategy notes that between 1996 and 2016, Ireland's growth rate was approximately 7.5%. A socio-demographic indicator profile of Waterford City and County compiled by AIRO (All-Island Research Observatory) in 2020 notes that Waterford's population has grown consistently and steadily since 1996, with an increase of 22.7% (21,496) observed over twenty years (1996-2016). Growth rates over previous decades have been much lower at 8.5% between 1979 and 1996, and 12.9% between 1971 and 1979. Analysis of census data reveals the population of County Waterford grew by 5.4% (5,834) from 2006 to 2011, with a marked slowdown in growth to 2.1% (2,381) in the following intercensal period (2011-2016) corresponding with a period of national economic contraction experienced post 2008. The historical growth figures provide some context for the determination of future population projections.

The ESRI research paper titled '*Regional Demographics and Structural Housing Demand at a County Level, December 2020*', funded by the Irish Department of Housing, Local Government and Heritage (under the collaborative research programme between the Department and the ESRI) provides detailed county level population projections to 2040, and is referred to in Circular Letter Housing 14/2021 issued on the 14th of April 2021, and accompanying document 'Guidance on the Preparation of a Housing Need and Demand Assessment'.

The guidelines issued in April 2021 state that in the case of Development Plans under preparation at the time of issue of the guidance, the methodology outlined in the December 2020 'Housing Supply Target Methodology for Development Planning' guidelines should be utilised to determine annual housing demand for the 6 years of the Plan.

This methodology requires the utilisation of the NPF 50:50 City scenario which is broadly consistent with the National Planning Framework strategy and consequently, the 2018 NPF 'Roadmap' document and the population parameters specified therein. Section 28 guidelines (*Housing Supply Target Methodology for Development Planning - Guidelines for Planning Authorities (2020)*) state that the '*established NPF Roadmap population projections for each county continue to be the population parameters for local authority development planning processes. City or County development plans must therefore plan for the identified population growth within these estimates and use them as the basis for strategic decision-making in their development plan process, including its core strategy, settlement strategy and housing policies*'.

Therefore, the identified population growth targets for County Waterford outlined in the NPF Implementation Roadmap have been utilised in this Housing Strategy and HNDA. Utilising population growth scenarios that align with NPF targets, the future population of County Waterford was estimated annually out to 2026 and 2031. The NPF population projections were availed of to develop an interpolation of the required increase per annum for County Waterford from the baseline year 2016 (Census) to NPF target years 2026 and 2031. This allowed for the determination of annual population projections for the development plan period.

The projected population growth in County Waterford throughout the plan period and beyond is outlined in Table 4.4 below. The high end of the NPF population projections have been utilised for 2026 and 2031.

Year	Population Total	Source	Percentage Increase	Annual Projected Population Increase	Total Population Increase 2022 – 2028
2006	107,961	Census	-		
2011	113,795	Census	5.40%		
2016	116,176	Census	2.09%		
2017	118,058		1.62%	1882	
2018	119,940		1.59%	1882	
2019	121,822		1.57%	1882	
2020	123,704		1.54%	1882	
2021	125,586		1.52%	1882	
2022	127,491		1.52%	1905	
2023	129,401		1.50%	1910	
2024	131,306		1.47%	1905	
2025	133,151		1.41%	1845	
2026	135,000	* NPF 'High' Projected	1.39%	1849	
2027	136,826		1.35%	1826	
2028	138,628		1.32%	1802	13,042
2029	140,420		1.29%	1792	
2030	142,195		1.26%	1775	
2031	144,000	* NPF 'High' Projected	1.27%	1805	

Table 4.4: Projected population growth in County Waterford

4.2 Determination of Average Household Size and Additional Households Required

This stage determines the additional increase in households per annum over the Development Plan period based on the application of an average household size for the projected population established in Stage 4.1 above.

The Census 2016 results indicate that County Waterford has a population to household ratio of 2.67, compared to state average of 2.75. However, the NPF states that this is expected to decline to around 2.5 by 2040, while also acknowledging that household sizes in urban areas tend to be smaller than in the suburbs or rural parts of the country. In line with this projected trend, a graduated average household size is utilised within this plan.

The projected housing demand for the 6 year development plan period as calculated in Table 4.2 above is 4,824, providing an annual average housing demand for County Waterford of 804 units (as shown in Table 4.5). This average has been utilised in projecting the annual household numbers, albeit a higher number of units is anticipated in the post-Covid 19 recovery phase in 2022-2024.

Housing supply data was available for 2017 to 2020 from the CSO, and this data was used to populate the table below (No. Anticipated Houses Per Annum). Census 2016 reveals that the number of households in County Waterford is 43,549. As noted above, projections of future housing delivery are based upon analysis of available completion data in the county, the restart of construction following Covid 19, analysis of commencement notices in the county and forecasts provided by the ESRI.

The Waterford County Development Plan period will run from Q3 2022 – Q2 2028. Table 4.5 has been structured to correspond with this plan period. The ESRI forecast a total of 18,000 new dwellings will be delivered in 2021, and 21,000 in 2022. Based on these expected trends in housing delivery and a ramping period post Covid-19, housing delivery in County Waterford is expected to be highest in 2023 and 2024 with a marginal decrease in subsequent years.

Year	Population Total	No. of Households (Private)	Average Household Size	No. Anticipated Houses Per Annum	Total Anticipated Houses between Q3 2022 - Q2 2028	Average Anticipated Houses Per Annum Between Q3 2022 - Q2 2028
2006	107,961					
2011	113,795					
2016	116,176	43,549	2.67			
2017	118,058	43,829	2.69	280		
2018	119,940	44,255	2.71	426		
2019	121,822	44,699	2.72	444		
2020	123,704	45,179	2.73	480		
2021	125,586	45,527	2.76	348		
2022 (H1)	126,539	45,364	2.79	185		
2022 (H2)	127,491	45,991	2.77	464		
2023	129,401	46,707	2.77	716		
2024	131,306	47,542	2.76	835		
2025	133,151	48,348	2.75	806		
2026	135,000	49,140	2.74	792		
2027	136,826	49,930	2.74	790		
2028 (H1)	137,727	51,095	2.69	421	4,824	804
2028 (H2)	138,628	51,695	2.68	340		
2029	140,420	52,623	2.66	761		
2030	142,195	53,551	2.65	758		
2031	144,000	54,479	2.64	755		

Table 4.5: Projected households over the plan period

As shown in Table 4.5, the average household size is thus projected to be 2.69 at the end of the plan period (2028). The number of households in County Waterford is expected to increase to 51,095 by Q3 2028.

4.3 Calculation of Estimated Distribution of Household Disposable Incomes

This stage calculates the estimated distribution of household disposable incomes for each of the 10 household deciles in 2016. Disposable income is the amount of income, after tax is deducted, that is available for spending and saving. It provides an important measure of housing affordability in an area i.e. the ability of a household to purchase their own home.

The CSO's Household Budget Survey (2015-2016) provides weekly and annual disposable incomes at national level, and this has been adjusted to county level based on application of "inflater/deflator" rate.

A deflator of 92.22 has been applied to County Waterford based on the CSO report on County Incomes and Regional GDP from 2018.

The data is divided into ten income deciles to represent the proportion of households in County Waterford within each decile during the survey.

Table 4.6 indicates that in 2017 after tax, about one third of the households in County Waterford (i.e. the first three deciles) have an average annual disposable income of up to €23,972.

Map 1 Household Disposable Income per person 2018

Income Range	Average Weekly Disposable Income (State) (€) (2009-2010)	Average Weekly Disposable Income (State) (€) (2015-2016)	% Change from 2009-2010 to 2015-2016	Assumed Annual % Increase from 2010 to 2016	Adjusted Average Weekly Disposable Income (State) (€) (2017)	% of Households in Each Category (State)	Average Annual Disposable Income (State) (€) (2017)	Waterford County Deflator	Waterford Average Annual Disposable Income (€) (2017)	No. of Households in Waterford (2016)

Table 4.6: Calculation of the distribution of disposable household incomes (annual and weekly) during the baseline year

4.4 Calculation of Average Annual Household Disposable Income Distribution

This stage provides the estimated distribution of annual household disposable incomes for each of the 10 household deciles throughout the plan period. To inform the forward projection of affordability in County Waterford during the plan period, the baseline income has been inflated annually using forecasted growth rates in relation to Gross Domestic Product (GDP). Table 4.7 above provides the Average Annual Disposable Income for 2017, calculated by applying the Waterford County deflator of 0.92.

The forecasted GDP rates have regard to the ongoing Covid-19 pandemic and the risk highlighted by the ESRI that further economic impacts might occur once income supports are withdrawn⁵. The CBI note that the 'Covid-19 pandemic will remain the main determinant of the economic outlook this year and in 2022⁶ in their Quarterly Bulletin (QB2) published in April 2021.

Based on the current economic outlook (including impacts of Covid-19 and Brexit) and the latest forecasted GDP growth rates (from the Department of Finance, Central Bank and the ESRI), GDP growth of 1.7% is applied for 2021 and a conservative forecasted GDP growth rate of 2.9% has been applied from 2022 onwards. The key outputs of this are shown are the forecasted annual average disposable household income for each decile shown in Table 4.7 below.

	2020	2021	2022	2023	2024	2025	2026	2027	2028

4.5 Calculation of Average Monthly Household Disposable Income Distribution

This stage provides the estimated distribution of monthly household disposable incomes for each of the 10 household deciles throughout the plan period. This has been based on the same information as Stage 4.4 (i.e. Calculation of Average Annual Household Disposable Income Distribution) and scaled to provide the monthly (rather than annual) estimates of disposable income per household in each decile.

	% Households	2020	2021	2022	2023	2024	2025	2026	2027	2028
% Growth		0.8%	1.7%	2.9%	2.9%	2.9%	2.9%	2.9%	2.9%	2.9%

Table 4.8: Calculation of Average Monthly Household Disposable Income Distribution (€) in County Waterford

4.6 Determination of Distribution of Total Anticipated Households

This stage provides the estimated distribution of total household units for each of the 10 household deciles throughout the plan period. The number and distribution of total households per decile throughout the plan period has been estimated from the distribution of housing units in the State from the Household Budget Survey⁷. This has been reflected upon in order to determine the projected number of private households per decile per year during the plan period.

Specifically, this has been based on the outputs of Stage 4.2 (i.e. Determination of Average Household Size and Additional Households Required) in relation to number of private households per year during the plan period as well as the distribution of housing units in the State from the Household Budget Survey.

⁷ CSO (2017) Household Budget Survey 2015-2016 - Table HS029: Households in sample by deciles and year.

Table 4.9 identifies the distribution of total households across each of the ten deciles during the plan period.

	% Households	2021	2022	2023	2024	2025	2026	2027	2028
1st Decile	9.83%	4475	4539	4631	4723	4814	4905	4995	5086

Table 4.9: Distribution of total households per decile (No. Households) in County Waterford

4.7 Determination of Distribution of Additional Households

This stage provides the estimated distribution of additional anticipated household units for each of the 10 household deciles throughout the plan period. The number of additional anticipated households per decile has been estimated throughout the plan period. Table 4.10 identifies the distribution of additional anticipated households across each of the ten deciles during the plan period.

	% Households	2022 (H2)	2023	2024	2025	2026	2027	2028 (H1)
1st Decile	9.83%	46	70	82	79	78	78	41
2nd Decile	10.57%	49	76	88	85	84	84	44

Table 4.10: Distribution of additional households per decile (No. Households) in County Waterford

4.8 Determination of Projected House Price Bands

Property price transaction data in County Waterford for 2020 has been analysed as part of the exercise to project house price bands. The Register includes new and second-hand properties. 2020 has been chosen to reflect the current market context and to understand latest house pricing and distribution of residential units per price band. The analysis carried out (based on the Property Price Register) reveals there were 1,272 transactions in County Waterford in 2020 across the eight price bands. For the purpose of this exercise, any properties that were sold for below market price have been omitted. In 2020, there were a total of 111 residential properties that sold for below market price in Co. Waterford. The following analysis of house price trends and historic transactional housing market data allows for a calculation of projected house price bands and projected annual price increase or decrease based on the percentage split of the eight price bands.

Price Bands / Value Distribution (2020)	Number of Transactions	% Total
0 – 100,000	219	17%
100,001 – 150,000	247	19%
150,001 – 200,000	244	19%
200,001 – 250,000	252	20%
250,001 – 300,000	133	10%
300,001 – 350,000	59	5%
350,001 – 400,000	49	4%
400,001+	69	5%
Total	1,272	100%

Table 4.11: Property Price Transaction Data for 2020 in County Waterford⁸

It is noted that c.55% of the property transactions in 2020 were in the sub €200,000 price range, with c.9% of properties selling for more than €350,000. Having considered the most recent house price activity in the County (i.e. 2020), it is important to review historical trends in property price fluctuation to provide greater insight into potential house price change over the development plan period. This analysis of historic house prices included the following information sources:

- Table HPA02 2011 – 2020 - (CSO Residential Property Transactions Data)⁹,
- Table HPM02 2011 – Q1 2021 - (CSO Residential Property Transactions Data)¹⁰,
- Residential Property Price Register 2011 - Q1 2021¹¹, and
- Daft Quarterly Reports 2011 - Q1 2021.

¹⁰ CSO (2020) Residential Property Transactions Data – Table HPM02 2011 –2020, <https://data.cso.ie/table/HPM02>.

¹¹ Residential Property Price Register (2011-2020), <https://www.propertypriceregister.ie/website/npsra/pprweb.nsf/PPR?OpenForm>.

The post 2008 recession and subsequent economic contraction resulted in average price decreases of c.16.7% and 3.6% in County Waterford in 2011 and 2012. The subsequent period of economic growth has resulted in large variances in house prices but in the main a trend of sustained increase is noted from 2014 onwards. Given the large variations observed post-recession and during the subsequent recovery and periods of growth, the average house price change over the period requires context and input from other recent economic data in order to provide a reliable basis for predicting future changes in average house prices from 2022 onwards. In addition, the impact of the COVID-19 pandemic (discussed further below) is now evident with the availability of data for 2020 and Q1 2021 and must be factored into the prediction of future house price trends.

The historic house price data for County Waterford allows for understanding of the local market context and how broader economic shifts and macroeconomic trends transfer locally. Data from the Residential Property Price Register, the CSO and Daft has been analysed and year on year trends (mean percentage change) have been presented below in Table 4.12.

Year	RPPR	CSO HPA02	CSO HPM02	Daft	Average
2011 (Base Year)	-	-	-		
2012	-15.4%	-17.2%	-18.4%	-15.8%	-16.7%
2013	-6.6%	0.4%	0.0%	-8.2%	-3.6%
2014	2.5%	11.5%	11.3%	5.7%	7.8%
2015	5.5%	5.2%	4.9%	15.1%	7.7%
2016	7.3%	11.8%	12.6%	8.5%	10.0%
2017	12.5%	9.1%	9.3%	6.9%	9.4%
2018	13.6%	13.0%	12.2%	7.4%	11.6%
2019	9.1%	7.2%	7.3%	2.4%	6.5%
2020	4.3%	6.1%	6.1%	5.1%	5.3%
2021 (Q1)	0.9%	-	2.0%	8.7%	3.9%

Table 4.12: Historic house price trends (Mean % Change) in County Waterford (Source: RPPR, CSO, Daft)

In terms of the data presented in Table 4.12, residential property transactions data available from the CSO (CSO Table HPA02) provided a mean sale price for each year of the 2012-2020 period, with 2011 used as the Base Year. Data from 3 sources was available for Q1 2021 at the time of writing. Analysis of the Residential Property Price Register reveals a 0.9% increase in Q1 2021 on the mean figure from 2020.

CSO Table HPM02 indicates a 6.1% increase in 2020 on the 2019 average, and a 2% increase in Q1 2021 on the 2020 average. Data from Daft indicates a 5.1% increase in 2020 on the 2019 average. The Daft.ie House Price Report for Q1 2021 includes the following data for Waterford:

Waterford County	Waterford City
Quarter-on-Quarter change: 2.3%	Quarter-on-Quarter change: 3.0%
Year-on-Year change: 6.1%	Year-on-Year change: 11.4%

The average year on year change was 8.7% as of Q1 2021 in Waterford based on the Daft House Price Report. The average increase based on the 3 sources for Q1 2021 is 3.9%.

Figure 4.1: Daft House Price Report - Q1 2021 – House Price Data Waterford

The Daft.ie House Price Report for Q2 2021 was published on the 28th of June 2021. Figure 4.2 below provides average list prices and year on year change as set out in the report. The average year on year change was 21.2% in Waterford County and 14.8% in Waterford City, with average list prices of €266,506 and €199,562 respectively. The report notes price rises in all markets and states the ‘largest price differences are in rural regions and counties with Longford, Wexford, Waterford, Kerry and Roscommon all seeing price rises above 20% year on year’.¹²

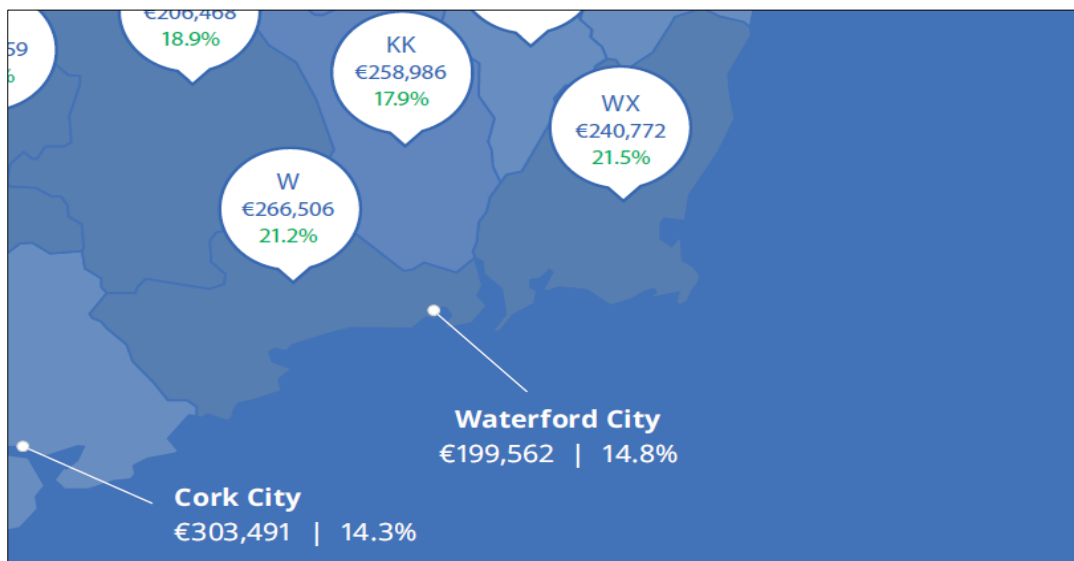

Figure 4.2: Daft House Price Report – Q2 2021 – House Price Data Waterford

The Daft.ie House Price Report for Q2 2021 includes a snapshot of asking prices nationwide and annual change across a number of house types. The snapshot illustrates that prices in Waterford City have increased across all house types listed in the last year with the largest percentage increase seen in 3 bed semi-detached units and 2 bed terraced units.

Figure 4.3: Asking Prices Nationwide (Source: Daft House Price Report – Q2 2021)

On balance, the data points to the potential that COVID-19 had a moderate deflating effect on house price increases in County Waterford in 2020 and 2021, having regard to the higher growth trends observed in previous years. House prices have increased nonetheless, and reports indicate a strong supply side constraint. Anecdotal evidence indicates that an increase in remote working/more flexible working arrangements during the pandemic is leading to strong demand for housing outside of the larger cities and towards more rural areas.

The Daft.ie House Price Report notes that supply shortages have led to rising house values stating that *‘the net result of strong demand and very weak supply can be seen in availability, the stock of homes on the market at any point in time. There were fewer than 12,000 homes available to buy on March 1 this year, down 40% on the already very low level seen a year ago. There is no precedent for availability this tight in the post-Celtic Tiger housing market’*. The report notes just over 3,600 properties on the market in Munster on March 1, down from 6,066 on the same date a year ago.

In terms of considering the future impact of Covid 19 on the housing market and house price trends, research by the ESRI¹³ published in May 2020 considers different economic scenarios and their corresponding potential impact on house prices. Their baseline scenario sees house prices increasing by just over 3 per cent in 2021. The report concludes by noting supply shortages may put additional upward pressure on house prices when the domestic economy recovers.

Further research by the ESRI¹⁴ on the Irish property market published on the 30th September 2020 states:

‘COVID-19 has already had an unprecedented impact on the Irish economy and this has extended to the housing and rental markets. While government support schemes are likely to keep incomes stable in the near term, as these measures are unwound and the labour market struggles to recover, incomes are likely to fall, putting downward pressure on housing demand’.

¹³ Allen-Coghlan M. and K. McQuinn (2020). ‘Property prices and COVID-19 related administrative closures: What are the implications?’ Working Paper No. 661, Economic and Social Research Institute (ESRI). Available online at: <https://www.esri.ie/publications/property-prices-and-covid-19-related-administrative-closures-what-are-the-implications>.

¹⁴ Allen-Coghlan, M., C. O’Toole and K. McQuinn (2020). ‘Assessing the impacts of COVID-19 on the Irish property market: An overview of the issues’, Special Article, *Quarterly Economic Commentary*, Economic and Social Research Institute (ESRI). Available online at: <https://www.esri.ie/publications/assessing-the-impacts-of-covid-19-on-the-irish-property-market-an-overview-of-the>.

The report by the ESRI notes also that the COVID-19 support measures introduced have insulated the housing market to some extent, however the decline in the number of housing completions will lead to some supply side constraints. Some demand side impact is also pointed to by the ESRI¹⁵ in 2021 with the phasing out of the Pandemic Unemployment Payment (PUP) and the Temporary COVID-19 Wage Subsidy Scheme (TWSS).

A further complication is noted in the medium-long term with the potential increase in remote working impacting the structural demand for housing at both a national and regional level, with the potential that a broader distribution of population occurs leading to house price increases in rural areas, with potential impacts for County Waterford.

The Society of Chartered Surveyors Ireland (SCSI) published their Annual Residential Property Review & Outlook for 2021¹⁶ on the 18th of January which forecasts price increases ranging from 3% in Dublin to 5% in Munster. The SCSI note price expectations are underpinned by lack of supply and economic performance. In further support of potential price increases in counties such as Waterford, the report notes the increase in home working is driving higher interest and prices in the regions.

To further inform potential house price change over the development plan period, projected inflation rates have been examined and used to predict average annual price increases. Data from Statista notes the inflation rate in Ireland in 2019 amounted to 0.88, turning negative in 2020 at – 0.2%¹⁷. Ireland's inflation rate is forecast to stabilize over the coming years at around two percent.

In relation to the distribution of house price bands, transaction data from 2020 has been utilised to inform the distribution reflected in Table 4.13. 55% of the property transactions in 2020 were in the sub €200,000 price range, with c.9% of properties selling for more than €350,000. This information has supported the calculation of projected house price bands.

Table 4.12 indicates an average price increase of 5.3% in 2020 and 3.9% in Q1 2021 in County Waterford. With the relaxation of Covid-19 restrictions, price increases are expected to increase further in 2021 and a 5% increase has been selected for the purposes of modelling projected house price bands. In Table 4.13 below, market changes to the end of the plan period have been factored in, including a projected annual increase in average house prices of 4% (in 2022) and 4% thereafter (from 2022 onwards) outlined below. The projected increases are based on analysis of the data outlined above including reports from the ESRI, SCSI and the CSO, and HNDA Guidance from the Department of Housing, Local Government and Heritage which includes a 'Modest Growth' House price scenario of 4% growth.

Table 4.13: Calculation of Projected House Price Bands (In Euro)

4.9 Calculation of Mortgage Capacity of Households

The following analysis considers housing affordability and determines whether households in each decile can qualify for a mortgage that enables them to purchase a house in the lowest price band, based on the current Central Bank of Ireland (CBI) rules on mortgage lending. These CBI rules include the 90% LTV limit which requires a minimum deposit of 10% before you can get a mortgage and the LTI limit which restricts the amount of money one can borrow to a maximum of 3.5 times gross income.

The model set out below in Table 4.14 establishes, based on these CBI macro-prudential rules outlined above, whether households in County Waterford could qualify for a mortgage that would enable them to purchase a house in the lowest price band under these rules.

If household gross income multiplied by 3.5 is less than 90% of the house value in the lowest projected price band, the household do not qualify for a mortgage that would enable them to purchase a home, and therefore progress to the private rental assessment (Step 11). Those households that can qualify for a mortgage progress to the needs assessment for ownership (Step 10). If households do not qualify for a mortgage and cannot afford private rental they then progress to social and affordable housing.

Table 4.14 outlines that in 2021 the first and second deciles do not have sufficient gross household income to meet the requirements of the CBI rules (i.e. 3.5 times their gross income is less than 90% of the house value in the lowest projected price band). From 2022 onwards, the third decile does not have sufficient income. Therefore, these deciles do not qualify for a mortgage and progress to the private rental calculation (and from there to social and affordable housing if they cannot afford private rental). Those households that can qualify for a mortgage progress to the needs assessment for ownership.

Year	Range	Additional Anticipated HH	Upper Value of Cheapest Price Band	Min LTV (90% of Cheapest House Price)	Maximum LTI (3.5 LTI)	Mortgage Qualification	Additional Anticipated HH That Qualify for a Mortgage	Additional Anticipated HH That Do Not Qualify for a Mortgage

Table 4.14: Determination of Mortgage Qualification for Household

4.10 Calculation of Projected Needs for Ownership

This section sets out the calculation of the approximate affordable house price for each of the ten deciles per year during the plan period based on the application of the annuity formula. Housing Affordability is associated with disposable income available to a household. An assumed preference for home ownership over rental has been applied as part of this modelling and assessment of needs.

The annuity formula utilised herein is set out in the Model Housing Strategy¹⁸ document published by the Department of the Environment and Local Government (as it was called at the time of publication). This formula determines the maximum affordable house price for each of the income deciles based on a number of variables discussed below. The Annuity Formula is based on the determination of an 'Affordability Threshold', a 'Loan to Value Ratio', an 'Annual Percentage Rate (APR) – Interest Rate', the determination of a 'Monthly Percentage Rate (MPR) - Interest Rate', and the determination of a 'Loan Term (Years/Months)'.

Following this, the calculation of the household surplus and/or deficit per price band has been undertaken with respect to the number of households that can qualify for a mortgage.

Section 93(1) of the Planning and Development Act, 2000, provides an appropriate definition of affordability by setting criteria for an eligible person as a:

'person who is in need of accommodation and whose income would not be adequate to meet the payments on a mortgage for the purchase of a house to meet his or her accommodation needs because the payments calculated over the course of a year would exceed 35 per cent of that person's annual income net of income tax and pay related social insurance'.

Therefore, if housing costs exceed 35% of a household's disposable income (HDI), the housing is deemed to be unaffordable as housing costs consume a disproportionately high percentage of the Household Disposable Income. In addition to a maximum affordability threshold of 35% of HDI, the following key variables have been used for calculation purposes:

- LTV ratio of 0.90,
- Annual interest rate (APR) of 3%,
- Loan term of 25 years.

25 years has been chosen as the loan term given the relative affordability of house prices in Waterford.

This formula therefore determines the maximum affordable house price for each of the ten income deciles as detailed in Table 4.15. Based on this information, the number of households not meeting the affordability criteria can be calculated.

It should be noted, that whilst some of the lower deciles have a maximum affordable house price that is higher than the lowest price band for that year, as outlined in the preceding step, these households would not qualify for a mortgage due to the current Central Bank rules.

¹⁸ DoE&LG "Part V of the Planning and Development Act, 2000, Housing Supply: A Model Housing Strategy and Step-by-Step Guide" (December, 2000).

Table 4.15: Approximate affordable house price (€) in County Waterford per decile

The following calculation continues the examination of affordability by assessing housing surplus and/or deficit per price band with regard to the number of households that can qualify for a mortgage. This calculation is based on additional households required, the projected house price bands, the determination of households that can qualify for a mortgage and the calculation of housing affordability. Table 4.16 therefore sets out the housing surplus/deficit per price band.

A surplus in a given price band has been identified where the number of housing units anticipated is greater than the number of households that qualify for a mortgage and have the ability to purchase a home at the upper value of that house price band. A deficit has been identified in a given price band where there are fewer households anticipated compared to the number of households that qualify for a mortgage and have the ability to purchase a home at the upper value of that house price band.

Throughout the plan period, there is generally a housing surplus in the lower price bands and housing deficit in the higher price bands as identified in Table 4.16. However, a sufficient number of houses is anticipated overall as households in the upper price bands can purchase a house in a lower price band.

Additionally, the bottom three deciles from 2022 onwards will not qualify for a mortgage (due to the current Central Bank rules), therefore there will be a sufficient number of houses within County Waterford for those households that qualify for a mortgage and have the ability to purchase a home at the upper value of the lowest house price.

Table 4.16: Calculation of Surplus/Deficit in Housing Available to Additional Households That Qualify For a Mortgage

4.11 Calculation of Ability to Access Private Rental

This section considers the households that cannot afford to access housing through the private rental market (i.e. those households that will not meet the affordability criteria to privately rent a home during the Development Plan period). It considers background information on rental price and demand by unit type within the current rental market in County Waterford.

Data from the Residential Tenancies Board (RTB) has been analysed to understand rental market trends and average rent prices by unit type. This facilitates a projection of estimated rental cost by unit type during the plan period. Based on this and the household income, a calculation of the number of households who don't meet the affordability criteria to privately rent a home has been undertaken.

The key inputs to this calculation therefore include disposable income per decile (established in Section 4.3), historical trends in rental prices, and the projected market rents per unit type (set out below). The demand for a particular unit type has been factored to estimate what type of unit the additional anticipated households are more likely to prefer to rent. If a household does not have sufficient income to meet the private rental rates for a unit in a given year (i.e. 35% of their disposable income is less than average market rent), they cannot afford the rent by themselves. Given that those households who do not qualify for a mortgage also cannot afford private rent, these households require social housing supports.

Year	One bed	Two bed	Three bed	Four plus bed	All bedrooms	YOY Change
	€	€	€	€	€	%
2020	579	747	773	1056	804	1%
2019	604	766	823	1018	798	9%
2018	538	704	757	948	732	9%
2017	469	657	692	893	670	8%
2016	480	601	628	844	620	7%
2015	449	545	611	739	580	N/A
Average	520	670	714	916	701	

Table 4.17: Historic rental prices by unit type in County Waterford

Trends in rental price change can be observed year on year from the data in Table 4.17 and these trends have been utilised in conjunction with other economic data considered in Section 4.8 to project annual growth rates in average rental prices of different unit types in the county. The projected rental price by unit type during the plan period is outlined in Table 4.18. Based on historic trends and analysis of the current rental market, a 4% growth figure per annum was adopted for the projections. This aligns with HNDA Guidance which includes a 4% 'Modest Growth' scenario for rental prices.

Year	One bed	Two bed	Three bed	Four plus bed
2021	602	777	804	1098
2022	626	808	836	1142
2023	651	840	870	1188
2024	677	874	904	1235
2025	704	909	940	1285
2026	733	945	978	1336
2027	762	983	1017	1390
2028	792	1022	1058	1445

Table 4.18: Projected rental prices by unit type in County Waterford

The number of households not meeting the affordability criteria (housing costs below 35 per cent of a household's disposable income) for private rental during the plan period are quantified below in Table 4.19. This calculation therefore takes into account rental prices, disposable incomes and the demand for a particular unit type, which has been considered in order to estimate what type of unit the additional anticipated households are most likely to prefer to rent. This preference has been informed by current data on the size of unit types in the county. The households quantified below that cannot do not qualify for a mortgage and cannot afford private rental are therefore considered to require social and affordable housing.

	2021	2022	2023	2024	2025	2026	2027	2028
1 bed	9	16	25	30	29	28	22	22
2 bed	21	41	64	74	72	71	70	38
3 bed	27	52	80	93	90	88	88	47
4 + bed	14	28	43	50	48	47	47	25
Total	71	137	212	247	239	235	234	125

Table 4.19: Number of Additional Anticipated Households That Do Not Qualify for a Mortgage and Cannot Afford Private Rental

A calculation has also been undertaken to determine the number of households that can afford private rental during the plan period despite not qualifying for a mortgage (Table 4.20). Of those households that do not qualify for a mortgage, an annual average of 82 households can afford to rent a 1 bedroom unit during the plan period. However, based on analysis of household size in County Waterford, a 1 bedroom unit would only be suitable for c.12% of these households, providing the totals outlined below in Table 4.20.

All other units in the private rental market are not considered to be affordable/adequately sized during the plan period and therefore those households that cannot qualify for a mortgage and cannot afford private rental during the plan period are considered to require some form of housing support.

	2022	2023	2024	2025	2026	2027	2028
1 bed	6	9	11	10	10	10	5
2 bed	0	0	0	0	0	0	0
3 bed	0	0	0	0	0	0	0
4 + bed	0	0	0	0	0	0	0
Total	6	9	11	10	10	10	5

Table 4.20: Number of Additional Anticipated Households That Do Not Qualify for a Mortgage and Can Afford Private Rental

4.12 Summary of Projected Social and Affordable Housing Needs

Section 94 (4) of the Planning and Development Act 2000 (as amended) states that a housing strategy shall include an estimate of the amount of social and affordable housing that will be required within the county during the period of the plan. Section 94 (5) (a) states that when making these estimates, the planning authority shall have regard to the supply of and demand for houses generally, the price of houses generally, the income of persons generally, the rates of interest on mortgages for house purchase and the relationship between the price of housing, incomes and rates of interest for the purpose of establishing the affordability of houses in the area of the development plan.

Section 4 of this report complies with the requirements of Section 94, and the estimates of social and affordable housing requirements have had regard to the factors outlined above, as detailed in the stages of Section 4. The Social (and Affordable) Requirements reflect the projected extent of ‘housing need’ during the strategy period. This relates to the additional anticipated households during that time and therefore it is in addition to the current extent of unmet need as per the social housing waiting list discussed in Section 3 and Section 5 of this report.

This section summarises the anticipated social and affordable housing need in County Waterford informed by the analysis undertaken and outcomes of the previous sections which considered affordability and the ability of households to access mortgages or the private rental market. The analysis does not differentiate between social and affordable housing need as income thresholds and criteria for affordable housing are unavailable at the time of writing.

The anticipated social and affordable housing need for County Waterford during the plan period is summarised below in Table 4.21, and is based on the assessments of affordability and mortgage qualification detailed in the preceding sections of this report.

The number of households that do not qualify for a mortgage and cannot afford private rental provides the anticipated social and affordable housing figure. It should be noted that affordability is based on whether rental costs are less than 35% of disposable income. Some households may be availing of private rental accommodation currently and paying more than 35% of disposable income, and this is not captured by this assessment of social housing need.

	H2 2022	2023	2024	2025	2026	2027	H1 2028
No. of Additional Anticipated Households	464	716	835	806	792	790	340
No. of Additional Households That Do Not Qualify for a Mortgage	143	221	258	249	244	244	130
No. of Additional Anticipated Households that Do Not Qualify for a Mortgage and Cannot Afford Private Rental	137	212	247	239	235	234	125
Social Requirement as a % of Total Additional Anticipated Households	30%	30%	30%	30%	30%	30%	37%

Table 4.21: Identified Housing Requirements over the plan period

The Waterford County Development Plan period will run from Q3 2022 – Q2 2028 and Table 4.21 accounts for this period. The identified social and affordable housing requirement ranges from 212 to 247 units annually during the plan period, equivalent to c.30% of the total of additional anticipated households in County Waterford.

As noted in the preceding sections, in the case of County Waterford, a number of households that do not qualify for a mortgage can afford private rental for a 1 bed unit during the plan period, however a 1 bedroom unit would only be suitable for c.12% of these households.

Figure 4.22: Summary of projected housing requirements over the plan period

5.0 Analysis of Housing Requirements in Waterford

5.0 Analysis of Housing Requirements in Waterford

5.1 Introduction

The following section considers specific elements of future housing demand in Waterford including the demand for single one-off dwellings in the countryside during the plan period, household size cohort, household tenure and social housing supply and demand. The NPF roadmap provides a population projection for County Waterford of 132,000 - 135,000 for 2026, and 137,000-144,000 for 2031. The projected housing demand for each local authority (as per the ESRI NPF Scenario Housing Supply Target) was outlined in Appendix 1 of the Ministerial Circular issued in December 2020 (Re. Structural Housing Demand in Ireland and Housing Supply Targets).

The projected housing demand for the 6 year development plan period as calculated in Table 4.2 (Section 4) is 4,824, providing an annual average housing demand for County Waterford of 804 units (as shown in Table 4.5). During the plan period it has been determined that 1,489 households of the additional anticipated households will not qualify for a mortgage during this period. The identified social and affordable housing requirement ranges from 212 to 247 units annually during the plan period, equivalent to c.30% of the total of additional anticipated households in County Waterford.

5.2 Single Housing in the Countryside

National Policy Objective 20 of the NPF states: ‘Project the need for single housing in the countryside through the local authority’s overall Housing Need Demand Assessment (HNDA) tool and county development plan core strategy processes’. Analysis of planning permission data from 2010 to 2020 (including total units permitted (Figure 5.1) and permissions granted for one off housing in Waterford (Table 5.1)) has been undertaken to assist in projecting the need for single housing in the countryside during the plan period. The data helps to understand typical quantum’s per annum of one off houses being permitted in the county and the proportion of overall residential permissions they comprise. In Table 5.1, ‘All Dwellings’ refers to multi-unit housing developments, one off houses/single houses in the countryside, private flats and apartments. Figure 5.1 reveals that the total number of permitted units in Waterford has trended upwards since 2015, peaking at 1168 units permitted in 2019, corresponding with positive economic growth following a lag period post 2011.

Figure 5.1: Total Units permitted in County Waterford (2010-2020)

Table 5.1 below illustrates the permissions for one-off dwellings as a percentage of total permissions for residential units during 2010 – 2020. This data identifies that on average approximately 31.5% of all granted residential units within any given year have been for single one-off dwellings. Data up to Q4 2020 is available from the CSO at the time of writing.

Year	Dwelling Type	Total		Dwelling Type	Total	One off Houses as a % of Total
2010	One off houses	119		All Dwellings	174	68.4%
2011	One off houses	96		All Dwellings	311	30.9%
2012	One off houses	67		All Dwellings	123	54.5%
2013	One off houses	66		All Dwellings	118	55.9%
2014	One off houses	84		All Dwellings	103	81.6%
2015	One off houses	87		All Dwellings	124	70.2%
2016	One off houses	111		All Dwellings	233	47.6%
2017	One off houses	113		All Dwellings	268	42.2%
2018	One off houses	148		All Dwellings	749	19.8%
2019	One off houses	155		All Dwellings	1168	13.3%
2020	One off houses	147		All Dwellings	420	35%
	Total	1,193		Total	3,791	
				Average (2010-2020)		31.5%

Table 5.1: Analysis of Permitted Applications for Single Houses in the Countryside in County Waterford (2010-2020)

In relation to trends in planning permissions for residential units, the number of one-off houses permitted has increased year on year since 2013 (increasing from 66 in 2013 to 155 in 2019). In 2019 a Strategic Housing Development (SHD) was permitted by An Bord Pleanála which contributed to the spike in total units permitted. The quantum of one off houses permitted annually (and indeed overall residential permissions) can be observed to trend to some degree with economic performance, with lower numbers observed during the economic recovery phase in the early to middle part of the last decade.

Given the overall number of units permitted per year averages at c. 340, the percentage of the total which are one off houses can be skewed in a given year by for instance a large housing development for multiple units being permitted. Therefore, the percentage is less important than the quantum of one offs permitted per year. This quantum provides an indication of the potential projection for single housing permissions over the development plan period.

Figure 5.2 below details units granted planning permission by type, illustrating that multi—unit housing developments have been the most prominent type in recent years. Apartments/private flats have started to become a more substantial proportion of overall permissions in recent years. As noted above, a large spike in units granted is observed in 2019, where a Strategic Housing Development (SHD) was permitted by An Bord Pleanála, contributing to the large increase in multi-development houses and apartments permitted.

Figure 5.2: Units permitted by housing type in County Waterford (2010-2020)

To assist further in complying with the NPF requirement to project the need for single housing in the countryside, forecasts have been undertaken based on historical data with confidence intervals utilised (Figure 5.3). The intervals (or confidence bounds) illustrate the outer limits within which the single housing values from 2021 - 2028 are likely to fall within.

The probability limits utilised in this calculation are 95% confidence level. In Figure 5.3, the trend line for one off houses is illustrated in a solid bold orange line, forecasting figures from 162 to 218 annually out to 2028.

Figure 5.3: County Waterford One-off Housing Projections (2021-2028)

Projections based on data from 2010 - 2019 indicated a 95% confidence interval of 124-200 for the number of one off houses in 2020. Based on 2020 data, the actual one off house figure of 147 is within this confidence interval but trends closer to the lower limit. The analysis is presented numerically in Table 5.2 illustrating the forecasted one off house numbers per year to 2028, and the upper and lower confidence bounds (intervals).

A number of socio-economic factors are currently at play which may influence the demand for one-off housing including the ongoing impact of Covid-19, the impact of an increase in remote working, and the transposal of NPF policies on rural housing (National Policy Objective 19 in particular) into county development plans. In relation to policy impacts, the Office of the Planning Regulator (OPR) is tasked with evaluating local authority forward planning including development plans, local area plans etc., and providing statutory observations to ensure consistency with relevant regional or national policies. Analysis of OPR submissions thus far indicates the transposal of NPF policies on rural housing into county development plans will most likely lead to a more restrictive approach to one-off housing, particularly in rural areas under urban influence. This has a potential to lead to a spike in one-off housing applications prior to a new development plan coming into force, as applicants anticipate the introduction of a more restrictive regime or policy implementation and aim to apply prior to this.

Having regard to the above and based on current economic conditions arising from Covid-19, it is likely the years 2021 and 2022 will be between the lower confidence bound and the forecast figure.

Year	One Off House Permissions	Forecast (One Off houses)	Lower Confidence Bound (One Off houses)	Upper Confidence Bound (One Off houses)
2010	119			
2011	96			
2012	67			
2013	66			
2014	84			
2015	87			
2016	111			
2017	113			
2018	148			
2019	155			
2020	147	162	124	200
2021		169	113	225
2022		176	104	248
2023		183	96	270
2024		190	89	292
2025		197	81	313
2026		204	74	335
2027		211	66	357
2028		218	58	379

Table 5.2: County Waterford One-off Housing Projections (2022-2028)

Regression analysis has been undertaken to understand the relationship between one off housing and potential correlating factors, namely projected population growth and employment rates. Figure 5.4 provides regression analysis for the relationship between one off housing and unemployment rates from 2011 to 2020 (based on regional unemployment data from the CSO Labour Force Survey (LFS) and the CSO Quarterly National Household Survey (QNHS))¹⁹.

¹⁹ <https://www.cso.ie/en/statistics/labourmarket/>

The Labour Force Survey²⁰ and the Quarterly National Household Survey available from the CSO provides unemployment data at a national level and regional level via the NUTS classifications. Unemployment data for the South-East Region which includes Waterford has been analysed and used to populate regional unemployment figures from 2011-2020 (utilised in Figure 5.4 and Table 5.3).

The R² value of 0.83 arising from the regression analysis indicates a strong negative affect of the unemployment rate on one off housing permissions - i.e. higher unemployment has a negative impact on the number of one off house permissions.

Figure 5.4: One off houses and unemployment – Regression Analysis

Table 5.3 below provides the numerical projections based on the link between one off housing permissions and the unemployment rate. Unemployment data from the CSO²¹ reveals that COVID-19 has continued to have a significant impact on the labour market in Ireland in April 2021.

The standard measure of Monthly Unemployment was 5.8% nationally in April 2021 (Seasonally Adjusted Figure), however the COVID-19 Adjusted Measure of Unemployment could indicate a rate as high as 22.4% if Pandemic Unemployment Payment (PUP) recipients are classified as unemployed. This alternative measure is down from 23.8% in March 2021 and from 30.5% in April 2020, illustrating the impact of the lifting of Government restrictions.

Table 5.3 below provides regional unemployment for the South-East from 2011-2019 sourced from the CSO Labour Force Survey (LFS) and in particular data classified by NUTS3 regions and ILO (International Labour Organisation) Economic Status. The LFS is the official source of labour market statistics for Ireland including the official rates of employment and unemployment.

The employment level for 2020 is based on the COVID-adjusted level of employment published by the CSO. The average monthly unemployment rate for 2020 was approximately 18.7 per cent according to the ESRI.

²⁰ <https://www.cso.ie/en/releasesandpublications/er/lfs/labourforcesurvey/lfsquarter32020/>

²¹ <https://www.cso.ie/en/releasesandpublications/er/mue/monthlyunemploymentdecember2020/>

Projected unemployment is available at a national level from sources such as the ESRI and the Central Bank. This information is not available at a regional level and therefore the national figure has been utilised to project a regional unemployment figure.

The ESRI in their Spring 2021 Quarterly Economic Commentary state:

'The average monthly unemployment rate for 2020 was 18.7 per cent. We estimate that the unemployment rate in Q4 of 2021 will be approximately 10 per cent with the average unemployment rate for 2021 overall being 16.7 per cent. We believe it is unlikely that the unemployment rate will approach its pre-COVID low of 4.7 per cent until 2023 at the earliest. We forecast that unemployment will average 7.3 per cent for 2022 as we expect growth in consumption, exports and investment to drive an improvement in the labour market'.

The Quarterly Bulletin (QB2) published by the Central Bank of Ireland in April 2021 forecasts the unemployment rate to be 8.1 per cent in 2022. A mid-point between these two estimates has therefore been adopted in this report for 2022. Finally, as noted above, based on the relationship between national and regional unemployment figures for the South-East observed in recent years (i.e. the South-East tends to have an unemployment figure 1.4% higher than the state average), a regional unemployment figure has been projected for the years 2021-2028 by adding 1.4 to the national unemployment projection.

Year	One Off House Permissions	Unemployment Rate (Regional)	
2011	96	13.5%	
2012	67	19.3%	
2013	66	17.2%	
2014	84	12.1%	
2015	87	12.3% ²²	
2016	111	10.7%	
2017	113	8.1%	
2018	148	7.6%	
2019	155	7.2%	
2020	147	20.1%	Covid-Adjusted
2021	61	18.1% ²³	Covid-Adjusted
2022	123	9.2%	
2023	139	7.0%	
2024	145	6.1%	
2025	145	6.1%	
2026	145	6.1%	
2027	145	6.1%	
2028	145	6.1%	

Table 5.3: One-off Housing Projections (2022-2028) based on regression analysis

As noted above, historical trends indicate a strong negative affect of the unemployment rate on one off housing numbers - i.e. higher unemployment has a negative impact on the number of one off house permissions. The regression analysis summarised in Table 5.3 provides a projection of one off housing permissions based on the regional unemployment rate, indicating an average of 141 from 2022-2028.

²² <https://www.cso.ie/en/releasesandpublications/er/qnhs/quarterlynationalhouseholdsurveyquarter42015/>

²³ <https://www.esri.ie/publications/quarterly-economic-commentary-spring-2021>

Anomalies can be observed in the analysis related to Covid-19 for 2020, as the high rate of unemployment (COVID-19 Adjusted Measure of Unemployment) did not dampen one-off housing permissions. Covid-19 has had many and varied impacts on the housing sector, including an increase in remote working, migration of people away from cities and an increase in demand for rural housing; which may explain in part the anomaly observed in 2020. Similarly, the projection of 61 for 2021 is likely to understate the actual total, given the Covid impacted unemployment rate.

Regression analysis was also undertaken to understand the relationship between one off housing and projected population growth. In this case, the R² value of 0.84 shows strong positive correlation between population and one of house numbers – i.e. as population increases it will have a strong upward effect on one off housing (all things being equal). The regression analysis examines two factors for projection purposes; in reality many factors will impact one off housing permissions, particularly rural housing policy.

Year	Population Total	One off houses
2011	113,795	96
2016	116,176	111
2017	118,058	113
2018	119,940	148
2019	121,822	155
2020	123,704	147
2021	125,586	172
2022	127,491	184
2023	129,401	196
2024	131,306	208
2025	133,151	219
2026	135,000	231
2027	136,826	242
2028	138,628	253

Table 5.4: One-off Housing Projections (2022-2028) (Relationship with population growth)

Other variables may impact the demand for single housing in the countryside during the plan period, such as the impact of remote working and Covid-19 on settlement and employment patterns, however the analysis provided herein is considered to provide data-led projections based on observable trends and analysis.

5.3 Household Size Cohort

Analysis of the historic household sizes has been undertaken to help predict household composition over the plan period. Analysis of the average intercensal change from 2006 – 2016 has been considered and annualised to assist with forecasting future change in the number of people per household.

Trends in County Waterford broadly reflect a national trend of fewer people per household, and this trend is forecasted to continue over the plan period. 1 and 2 person households will form the largest overall cohort over the plan period, amounting to a combined total of 57.9% of all households by 2028. The number of households comprising of 4 people or more will continue to decline between 2022 and 2028.

Figure 5.5: Forecasted household size cohorts during the plan period

5.4 Household Tenure

The NPF identifies the need to estimate the demand for different tenure types during the development plan period. This estimation has been informed by the historic tenure split observed in County Waterford during the intercensal change from 2006 – 2016 which has been considered and annualised to assist with forecasting future change in tenure split. The ‘type of occupancy’ categories are as provided by the CSO.

Figure 5.6: Forecasted household occupancy during the plan period

By 2028, it is forecasted that 61.2% of all households will be owner occupied in County Waterford (including with mortgage and without mortgage). It is forecasted that private rental figure will increase to 17.2% in 2028, and that the units rented from a voluntary body will increase to 2.5%. It is forecasted that units rented from the local authority will increase to 13.9% by 2028.

5.5 Social Housing Supply and Demand

Existing Social Housing Needs

The existing social housing need is discussed in Section 3.5. In summary, the social housing waiting list for County Waterford stands at 1,267 at the time of writing. This existing need does not account for the future needs assessed in Section 4, which would be in addition to any remaining need unmet at the beginning of the strategy period 2022- 2028.

There was an increase of 15.8% (173 households) in the number of households qualifying for social housing support recorded in Waterford City and County from 2019 to 2020. The largest cohort of applicants is within the 30-39 age bracket (main applicant) at 365. There were 37 applicants aged 70 +, and 194 applicants aged less than 25.

The location preference and preference in terms of accommodation size has been compiled by Waterford City and County Council for different parts of the county. In Waterford City, the data illustrates that Ferrybank and the North West Suburbs are the most preferred locations (Table 5.5). The data in the following tables includes HAP, RAS and Voluntary Bodies.

The majority of applicants have a stated preference for a 1 bed unit (789), equating to more than half of all applicants.

FIRST AREA OF CHOICE	1 bed	2 bed	3 bed	4 bed	Total
Ballybeg/Kilbarry	26	11	6	3	46
Central/Inner City	142	46	10	0	198
Dunmore Road	105	67	36	2	210
Farran Park	1	0	0	0	1
Ferrybank	214	89	31	3	337
Larchville/Lisduggan	81	49	11	1	142
North West Suburbs	142	77	33	5	257
Sacred Heart	78	49	23	1	151
Total City	789	388	150	15	1342

Table 5.5: Waterford City - First Choice Location Preference and Unit Size Preference

In Dungarvan the most preferred location is Abbeyside and the total number of applicants is 203. In Tramore the total number is 138.

Abbeyside	51	26	7	1	85
Ballinroad	14	8	2	0	24
Dungarvan	45	35	13	1	94
Total Dungarvan	110	69	22	2	203
Tramore	68	55	10	5	138

Table 5.6: Dungarvan and Tramore - First Choice Location Preference and Unit Size Preference

In the remained of the county, Dunmore East and Kilmacthomas are listed as the most preferred location.

Sheltered Housing	36	0	0	0	36
Dunmore East	14	11	3	1	29
Kilmacthomas	9	12	4	0	25
Kilmeaden	15	4	2	0	21
Crooke	10	8	1	0	19

Cappoquin	7	2	1	0	10
Tallow	3	5	2	0	10

Table 5.7: Waterford County - First Choice Location Preference and Unit Size Preference

Figure 5.7: Social housing need – current tenure

In relation to the duration of time applicants have been on the social housing waiting list in County Waterford, the largest cohort is noted within the 1-2 years bracket, however a sizeable number of applicants are on the waiting list for 7 years or greater.

Figure 5.8: Length of Time on Record of Qualified Households (Waiting List)

Homelessness & Emergency Accommodation

The number of households who have presented to Waterford Council Homeless Services has increased substantially year on year with 1,267 households presenting during 2020 (information provided by the Housing Section of Waterford City & County Council). Of those, 756 received a formal homeless assessment with 146 single persons and 25 families accommodated in Temporary Emergency Accommodation (TEA) during 2020. Of the 756 households which received an assessment, 76% were single and 24% were families.

As of the 30th April 2021 there were 55 single persons and 7 families in TEA in Waterford.

Figure 5.9: Homeless Presentations 2014-2020 (County Waterford)

In relation to capacity, there are 20 “Own Front Door” (OFD) units provided in Waterford City and 2 units in Dungarvan. The number of Section 10 (S10) Temporary Emergency Accommodation (TEA) beds/units varies as there is flexibility to meet demand as it arises. Temporary Emergency Accommodation can be utilised for long term or transitional accommodation as the need arises, however, the number of S10 TEA beds based on the service level agreements in place is 69 based in Waterford City.

Waterford City & County Council have prioritized homeless preventions, supported exits and sustained tenancies in 2020 through partnership and collaborative working with the Health Service Executive (HSE) and the various Homeless Service Providers in Waterford; and by utilising various projects in Waterford Integrated Homeless Services centre including:

- Homeless Prevention & Support Service,
- Advice & Information Service,
- Tenancy Support & Sustainment Service,
- Homeless HAP Place Finder Service and;
- Housing First Service.

In relation to the spatial distribution of social housing need, the core strategy prioritises growth in the settlement hierarchy to Waterford City, Dungarvan and Tramore, in line with national and regional policy contained in the NPF and the RSES.

The location preference data for social housing discussed above also notes that Waterford City, Dungarvan and Tramore are the most preferred locations for housing applicants.

The policy framework under the NPF and RSES for concentrating growth to urban and built up areas, urban in-fill and regeneration will impact the spatial distribution of housing, with development plans required to comply with this policy direction. Therefore, it is reasonable to conclude that social housing need will increase in the higher tier settlements of Waterford where population and growth is being focused and directed to.

Deprivation

A review of the Pobal Deprivation Index and Geoprofiling Reports reveals the Pobal HP Index score for County Waterford in 2016 was -2.35 which is considered marginally below average. The AIRO report summarises the key findings for Waterford in relation to the deprivation index and notes that relative to the State, the South-East Region has a higher level of deprivation. As the graph illustrates, the relative affluence and deprivation score for the State is 0.6, while the corresponding value for the South-East Region is -3.2. Both Waterford City and County are more deprived than Ireland as a whole, with Waterford City recording a rate of -4.8 (similar to Wexford) and Waterford County recording a rate of -0.6.

The Waterford City South LEA has by far the lowest level of deprivation with a score of -9.7. While still classed as marginally below average (-10 to 0) this LEA is very close to being classed as ‘Disadvantaged’. With the exception of Waterford City East (3.5), all other LEAs are also classed as marginally below average.

Figure 5.11 sourced from Pobal classifies each of the 504 Small Areas (SAs) in Waterford on the basis of their scores on the HP Pobal Affluence and Deprivation Index. As the map shows, most of Waterford, and in particular rural Waterford, is classified on the Pobal HP Index as being ‘marginally above average’ or ‘marginally below average’.

Figure 5.11: Pobal Deprivation Map 2016 (County Waterford)

The northern half of the county has almost equal numbers of SAs that are classified as ‘marginally below average’ and ‘marginally above average’. Below-average and disadvantaged values pertain in much of Waterford’s MASP area and in towns such as Dungarvan and Tramore.

The highest levels of disadvantage are located within the MASP area in areas such as Larchville, Lisduggan and Morrison’s Road. Across Waterford City and County (including Kilkenny MASP area) a total of 110 SAs are classed as Disadvantaged or Very Disadvantaged. This accounts of a total population of 24,821 or 20% of the total population.

Figure 5.12: Waterford - Pobal HP Deprivation Index, Relative Score 2016 - by Population (Source: Pobal/AIRO)

Based on analysis of the Pobal Geoprofiling Reports (insert included as Table 5.8 below) and the Pobal Deprivation Map for County Waterford, and having regard to the settlement strategy and planning policy in regards to population distribution, it is considered there is likely to be a social housing need in Waterford City, Dungarvan, Tramore and Dunmore East.

Traveller Accommodation

The Waterford City & County Council Traveller Accommodation Programme (TAP) 2019-2024 notes that a midterm review of the 2014-2018 TAP was conducted in 2016 and an updated assessment of need for the City and County was carried out. The need as identified is outlined in the following table.

Accommodation Type	Existing Need	Projected Need	Total
Standard Housing	20	7	27
Group Housing	5	-	5
Halting Site	5	9	14
Transitional Housing	3	-	3
Rental Accommodation Scheme	9	-	9
Private Rented/HAP Scheme	-	3	3
Total	42	19	61

Table 5.9: Summary of Proposed Accommodation need by Type Following the Mid Term Review

The highest demand in existing need is for Standard Housing and RAS. In terms of projected need the highest demand is for accommodation on Halting Sites. Standard Housing includes houses provided directly by Waterford City & County Council and by Approved Housing Bodies.

The accommodation provided during the 2014-2018 period included:

- Standard Housing units - 31
- Group Housing – 4
- Halting Site - 2

The TAP notes that In November 2018 there were 224 Traveller families resident in Waterford City and County. These families were living in a range of accommodation types including Standard Housing, Serviced Halting Site bays, Approved Housing Bodies and Private rented/RAS.

Of the 224 families and individuals identified in the Annual Estimate of Traveller families 2018, 148 had been satisfactorily accommodated leaving a total of 76 families and individuals whose accommodation needs have not been met.

The TAP includes the following breakdown of the accommodation type needed which was determined following an assessment of the accommodation needs of the 76 families and individuals without long term accommodation:

Accommodation Type	Number of Units required
Standard Housing	36
Group Housing	16
Halting Site	21
Long Term Supported Accommodation	3
Total	76

Figure 5.13: Existing Need for Traveller accommodation in County Waterford

The TAP also includes projected need for the period 2019-2024 included below in a summary table of existing and new household need.

Accommodation Type	Existing Need	New Household Need	Total Need
Standard Housing	36	15	51
Private Rented Accommodation	-	5	5
Halting Site	21	5	26
Transitional Housing	3	-	3
Group Housing	16	-	16
Total	76	25	101

6.0 Conclusion

6.0 Conclusion

The Housing Strategy has been prepared in accordance with the requirements of the Planning and Development Act 2000 (as amended) taking into account the following:

- the existing need and the likely future need for housing in County Waterford,
- the need to ensure that housing is available for persons who have different levels of income,
- the need to ensure that a mixture of house types and sizes is developed to reasonably match the requirements of the different categories of households, including the special requirements of elderly persons and persons with disabilities,
- the need to counteract undue segregation in housing between persons of different social backgrounds.

The Housing Strategy provides a framework to inform future policies and objectives relating to housing in Waterford City and County. It includes the determination of housing requirements in County Waterford over the period of the development plan 2022-2028. Demographic, economic and social inputs have been examined and utilised to estimate projected population change, income change, housing affordability, household formation and associated housing needs in County Waterford. These inputs have been sourced from the CSO, ESRI, CBI, Daft, RPPR and from Waterford City and County Council amongst other sources. The information sourced is correct at the time of writing, however it is acknowledged that projected economic data, population and planning permission data may be impacted by the ongoing COVID-19 pandemic.

The Housing Strategy complies with the NPF requirement to undertake a Housing Need Demand Assessment (HDNA) to correlate and accurately align future housing requirements. The HDNA undertaken for County Waterford and documented herein provides a robust evidence base to support decisions about new housing supply, the proportion of social and affordable housing required, and the provision of specialist housing and housing related services. The HDNA undertaken can perform as a database to allow scenario testing to inform key decisions on housing need and supply, in line with NPF requirements. The HNDA contained herein also complies with National Policy Objective 20 of the NPF which requires a projection of the need for single housing in the countryside during the plan period.

The Housing Strategy includes an estimate of the amount of social and affordable housing that will be required within the county during the period of the plan in order to comply with Section 94 (4) of the Planning and Development Act, 2000 (as amended). In preparing the housing strategy, the Summary of Social Housing Assessments 2020 (prepared under section 21(a) of the Housing (Miscellaneous Provisions) Act 2009) has been analysed insofar as it relates to the development plan area.

As noted herein, the Housing Strategy has taken cognisance of the significant changes in planning legislation and policy, notably the National Planning Framework (NPF) and the Regional Spatial and Economic Strategy (RSES) for the Southern Region.

The report considers the potential increase in remote working impacting the structural demand for housing at both a national and regional level, with potential implications for distribution of population. In this regard, the Housing Strategy has had regard to the evolving situation regarding COVID-19 and assumptions made throughout the report are based on the best available evidence at the time of writing.

The projected housing demand for the 6 year development plan period as calculated using the methodology outlined in Section 28 guidelines (Housing Supply Target Methodology for Development Planning - Guidelines for Planning Authorities (2020)) is 4,824, providing an annual average housing demand for County Waterford of 804 units. This average has been utilised in projecting the annual household numbers, albeit a higher number of units is anticipated in the post-Covid 19 recovery phase in 2023-2024.

The identified social and affordable housing requirement ranges from 212 to 247 units annually during the plan period, equivalent to c.30% of the total of additional anticipated households in County Waterford. As noted in the preceding sections, in the case of County Waterford, a number of households that do not qualify for a mortgage can afford private rental for a 1 bed unit during the plan period, however a 1 bedroom unit would only be suitable for c.12% of these households, and this has been factored into the overall need.

The social (and affordable) requirements reflect the projected extent of 'housing need' during the strategy period. This relates to the additional anticipated households during that time and therefore it is in addition to the current extent of unmet need as per the social housing waiting list discussed in Section 3 and Section 5 of this report.

In relation to the spatial distribution of social housing need, the core strategy prioritises growth in the settlement hierarchy to Waterford City, Dungarvan and Tramore, in line with national and regional policy contained in the NPF and the RSES. The location preference data for social housing discussed above also notes that Waterford City, Dungarvan and Tramore are the most preferred locations for housing applicants. The policy framework under the NPF and RSES for concentrating growth to urban and built up areas, urban in-fill and regeneration will impact the spatial distribution of housing, with development plans required to comply with this policy direction. Based on analysis of the Pobal Deprivation Index, Pobal Geoprofiling Reports and the Pobal Deprivation Map for County Waterford, and having regard to the settlement strategy and planning policy in regards to population distribution, it is considered there is likely to be a social and affordable housing need in Waterford City, Dungarvan, Tramore and Dunmore East.

The number of households who have presented to Waterford Council Homeless Services has increased substantially year on year with 1,267 households presenting during 2020 (information provided by the Housing Section of Waterford City & County Council). Waterford City & County Council have prioritised homeless preventions, supported exits and sustained tenancies in 2020 through partnership and collaborative working with the Health Service Executive (HSE) and the various Homeless Service Providers in Waterford.

In compliance with the NPF requirement to project the need for single housing in the countryside, forecasts have been undertaken based on historical data with confidence intervals utilised (Figure 5.3). The intervals (or confidence bounds) illustrate the outer limits within which the single housing values from 2021 - 2028 are likely to fall within, forecasting figures from 162 to 218 annually out to 2028 (based on historical data). The regression analysis summarised in Table 5.3 provides a projection of one off housing permissions based on the regional unemployment rate, indicating an average of 141 from 2022-2028. Other variables may impact the demand for single housing in the countryside during the plan period, such as the impact of remote working and Covid-19 on settlement and employment patterns or the impact of government policy and planning policy, however the analysis provided herein is considered to provide data-led projections based on observable trends and analysis.

Important notice

At Deloitte, we make an impact that matters for our clients, our people, our profession, and in the wider society by delivering the solutions and insights they need to address their most complex business challenges. As the largest global professional services and consulting network, with over 312,000 professionals in more than 150 countries, we bring world-class capabilities and high-quality services to our clients. In Ireland, Deloitte has over 3000 people providing audit, tax, consulting, and corporate finance services to public and private clients spanning multiple industries. Our people have the leadership capabilities, experience and insight to collaborate with clients so they can move forward with confidence.

This document has been prepared by Deloitte Ireland LLP for the sole purpose of enabling the parties to whom it is addressed to evaluate the capabilities of Deloitte Ireland LLP to supply the proposed services.

This document is not an offer and is not intended to be contractually binding. Should this proposal be acceptable to you, and following the conclusion of our internal acceptance procedures, we would be pleased to discuss terms and conditions with you prior to our appointment and no reliance may be placed for any purposes whatsoever on the contents of this document.

Deloitte Ireland LLP is a limited liability partnership registered in Northern Ireland with registered number NC1499 and its registered office at 19 Bedford Street, Belfast BT2 7EJ, Northern Ireland.

Deloitte Ireland LLP is the Ireland affiliate of Deloitte NSE LLP, a member firm of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"). DTTL and each of its member firms are legally separate and independent entities. DTTL and Deloitte NSE LLP do not provide services to clients.
